Texas Higher Education Coordinating Board
2009-2010 Statewide Annual Licensure Report

Background

Occupational licensure is mandated by state and/or federal law. It offers practitioners title protection and defines the scope of practice for a field. Licensure examinations ensure an individual possesses the competence necessary for a specific profession. By testing, the state or professional organization that awards the license helps to safeguard the public from injury by the practitioner.

Certification is not legislatively mandated for practice of the profession and is offered through non-governmental agencies and associations. As with licensure exams, certification exams ensure competence within a given field or profession. A certifying body grants recognition of an individual's attainment of defined professional qualifications and continuing education efforts.

Introduction

This report provides licensure and certification examination results for approved technical associate degree and certificate programs, leading to professions requiring licensure or certification. The Texas Higher Education Coordinating Board uses this information as part of its overall assessment of the effectiveness of vocational education programs at community and technical colleges in the state.

In the spring of 1997, the Coordinating Board and the Legislative Budget Board expressed an interest in using licensure data as a specific performance measure of programs at community and technical colleges. Effective September 1, 1997, the 75th Texas Legislature enacted House Bill 2517 requiring public community colleges to annually report on nine performance measures, one of which is the percentage of students who pass a licensure exam.

Texas Accountability System for community and technical colleges includes the measure just mentioned. In addition, it contains an excellence measure identifying those programs with licensure/certification exam pass rate for each of the past three years of 90 percent or higher pass rate for each of three consecutive years <u>and</u> 15 or more graduates over the period.

The Coordinating Board recognizes that the success rate for licensure and certification is an integral part of the overall success of many workforce development programs. This report contributes to the process of continuous improvement and scholastic accountability in Texas community and technical colleges.
