Elaine Mendoza	San Antonio
Nancy R. Neal	Lubbock
Dr. Lyn Bracewell Phillips	Bastrop
Curtis E. Ransom	Dallas
A. W. "Whit" Riter III	Tyler

Commissioner of Higher Education

Dr. Raymund A. Paredes

Coordinating Board Mission

The Texas Higher Education Coordinating Board's mission is to work with the Legislature, Governor, governing boards, higher education institutions and other entities to help Texas meet the goals of the state's higher education plan, *Closing the Gaps by 2015*, and thereby provide the people of Texas the widest access to higher education of the highest quality in the most efficient manner.

Coordinating Board Philosophy

The Texas Higher Education Coordinating Board will promote access to quality higher education across the state with the conviction that access without quality is mediocrity and that quality without access is unacceptable. The Board will be open, ethical, responsive, and committed to public service. The Board will approach its work with a sense of purpose and responsibility to the people of Texas and is committed to the best use of public monies. The Coordinating Board will engage in actions that add value to Texas and to higher education. The agency will avoid efforts that do not add value or that are duplicated by other entities.

The Texas Higher Education Coordinating Board does not discriminate on the basis of race, color, national origin, gender, religion, age or disability in employment or the provision of services.

About the THECB Financial Aid Report

The Texas Legislature, Coordinating Board and people of Texas have been concerned for many years about the ability of Texas students to pay for college.

The Texas Charter for public higher education (1987) called for higher education to be accessible to all those who seek and qualify for admission. "Neither financial nor social status should serve as a barrier to opportunities for higher education in Texas. Financial aid as well as academic and social support services should be available. Texas colleges and universities shall actively recruit and retain students from populations that have not heretofore fully participated in higher education."[1]

Closing the Gaps by 2015 (2000) states, "Economically disadvantaged students represent an increasing proportion of the state's traditional college-age population and should be considered a high priority for gift aid. An unknown number of students never consider higher education because they believe they cannot afford it. Colleges and universities can attract students who historically have not believed that higher education is within their reach by making certain that higher education is affordable through financial aid."[2]

Since 1993 the Legislature has included in the General Appropriations Act a provision that calls for the Coordinating Board to prepare and submit to the Legislative Budget Board an annual report on financial aid in Texas.

This report provides the members of the Texas Legislature an update on the financial aid expenditures for the 2005-2006 academic year and an analysis of students who participated in need-based student aid programs.[3]

The report contains general statistical information about financial aid in Texas of students who participate in need-based aid programs. It is important to note that the data presented here may differ slightly from statistics found in other reports.[4]

For this report, 146 Texas public and independent colleges and universities contributed financial aid data for Fiscal Year 2006.

All data in the report is from the 2006 Financial Aid Database unless otherwise noted.

[3] Appendix B describes the federal student aid awarding methodology.
[4] See Appendix A for a description of data restrictions and variables.

Summary: Fiscal Year 2006

- ✓ Students enrolled in Texas institutions of higher education in 2005-2006 received a total of $4.76 billion in the form of gift aid (awards such as grants and scholarships that are free to students and do not have to be repaid), work-study awards (part-time jobs provided to needy students through the financial aid office), and loans (funds provided to students with the understanding that they will be paid back with interest over time).

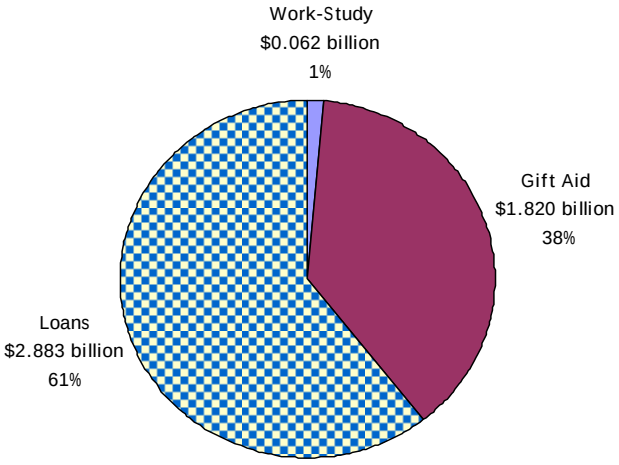
- ✓ More than 582,000 students in Texas received some type of need-based aid. This represents 49 percent of all students enrolled at public and independent nonprofit colleges and universities and 62.5 percent of the students who enrolled *and* applied for need-based aid.

- ✓ The TEXAS Grant program provided $186 million to over 61,000 students enrolled in Texas public and independent colleges and universities. More than 73 percent of the recipients were from families with annual incomes less than $40,000.

- ✓ Approximately 355,000 students (61 percent of all need-based aid recipients) were granted Federal Pell Grants totaling more than $863 million.

- ✓ The federal government provided 76 percent of the aid received.

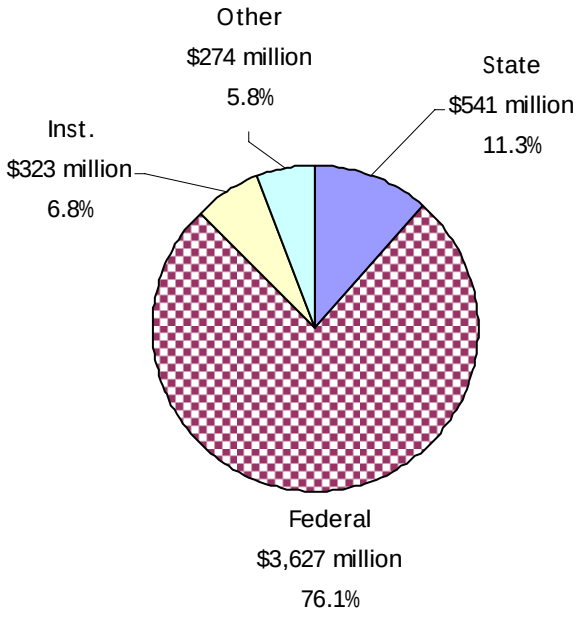
Figure 1: Types of Aid to Students in Texas, FY 2006 [5]



As shown in Figure 1, *Gift Aid* in Texas accounted for 38 percent of the aid awarded statewide to students enrolled in non-profit institutions of higher education. Students participating in federal, state, and institutional work-study programs received $62 million in assistance (1 percent of the total aid). Loans, by far the highest-volume type of aid in the state, accounted for 61 percent or $2.9 billion in student aid. Of this amount, more than 92 percent was distributed through federal loan programs, a reliance on federal resources that is addressed in Figure 2 (page 3).

[5] Students who received only merit aid, such as academic or athletic scholarships and students who used non-educational loans or credit cards to finance their education are not reflected in these figures (Appendix A).

Figure 2: Sources of Aid to Students in Texas, FY 2006



Federal aid, including loans, gift aid, and work-study, accounted for 76.1 percent or $3.63 billion ($179 million more than in FY 2005) of student aid. State aid, including the same elements, totaled $541 million or 11.3 percent of student aid ($74 million more than in 2005).[6] The TEXAS Grant and Tuition Equalization Grant Programs accounted for the majority of growth in state aid. Student loans accounted for $242 million (80 percent) of the total growth in aid (federal, state and independent) between FY 2005 and FY 2006.

Other aid includes Institutional Aid, Categorical Aid and Alternative Loans.

- Institutional aid (financial aid provided by the institution that the student attends) accounts for 7 percent of the total aid, or more than $323 million. This figure represents institutional gift aid ($288 million), work-study ($1.5 million), student deposit scholarships ($1.4 million) and a variety of aid funded through set-asides from designated tuition ($32 million). The figure includes only students identified as having financial need through the Free Application for Federal Student Aid (FASFA), and is not a complete picture of institutional aid. Students who qualify for institutional merit scholarships but receive no form of need-based aid are not included in the THECB Financial Aid Database.
- Categorical aid in Texas was not insignificant. It accounted for 3 percent or more than $121 million to support the education of students with financial need. These are funds from organizations outside the institution, such as Parent Teacher Organizations and the Veteran's Administration, that are not part of the aid package awarded by the institution's financial aid office and may not include a financial need requirement.
- Alternative loans, which account for 3 percent or almost $153 million, are designed to help fill the gap between a student's aid and resources (including Expected Family Contribution (EFC)) and the amount needed to cover the total cost of attendance. Alternative loans provide additional funding after a borrower has maximized his or her federal loan eligibility. This can be a convenient source of additional funding for higher education, but students need to look carefully at individual loan program provisions and select programs that provide them the greatest benefit for the related costs. [7]

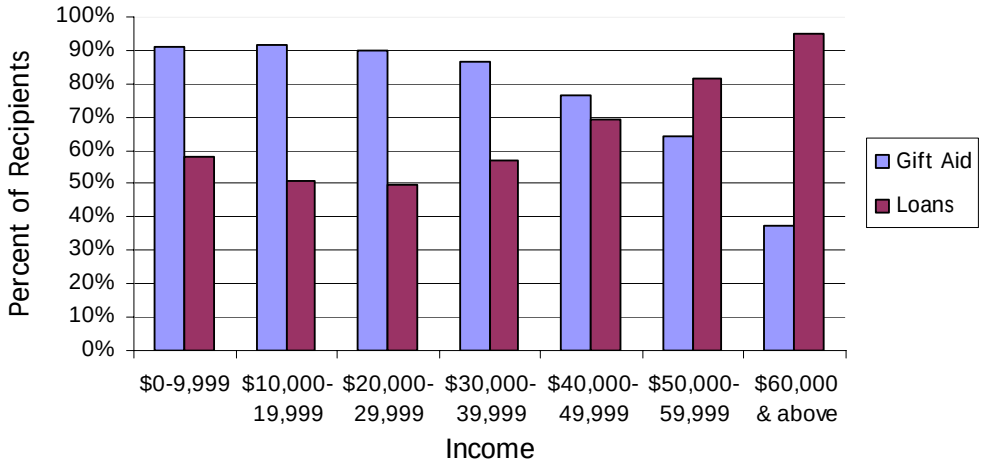
Financial Aid to Students – FY 2006

Appendix B provides an overview of the process used to assess student financial need. Figure 3 shows the distribution of financial aid recipients in Texas by income level. Two trends are indicated:

- Low-income students receive the greatest amount of gift aid, as would be expected: 91 percent of the students in the $0-$9,999 income range received gift aid; 58 percent received loans.

- Students in the $60,000+ income bracket[8] often have high expected family contribution (EFC) levels from the federal need analysis system and may receive little or no gift or work-study assistance. If family assistance is not available or forthcoming, students may need or choose to borrow funds to cover the costs of an education.[9] Only 37 percent of the students in the $60,000+ income range received gift aid; 95 percent received loans. Figure 3 represents that students in the $60,000+ income bracket are borrowing significantly to finance their education.

Figure 3: Financial Aid to All Recipients by Income (Grants vs. Loans), FY 2006



It is the case, however, that Texas students on both ends of the financial spectrum who receive financial aid rely largely on student loans to finance their education. Figures 4 and 5 on the following two pages show the reliance on loans for students with financial need divided into two groups: "Basic Needy Students" and "Needy Students Using Aid in Part to Replace Family Contribution."

[8] The calculation of Expected Family Contribution is sensitive to the size of the family and the number of children in college at the same time. A three-member family with an income of $60,000 would show a higher EFC than an eight-member family with the same income. The difference would be even greater if the second family had more than one person in college at the same time.

[9] *The College Board: Trends in Student Aid 2006*, http://collegeboard.org.

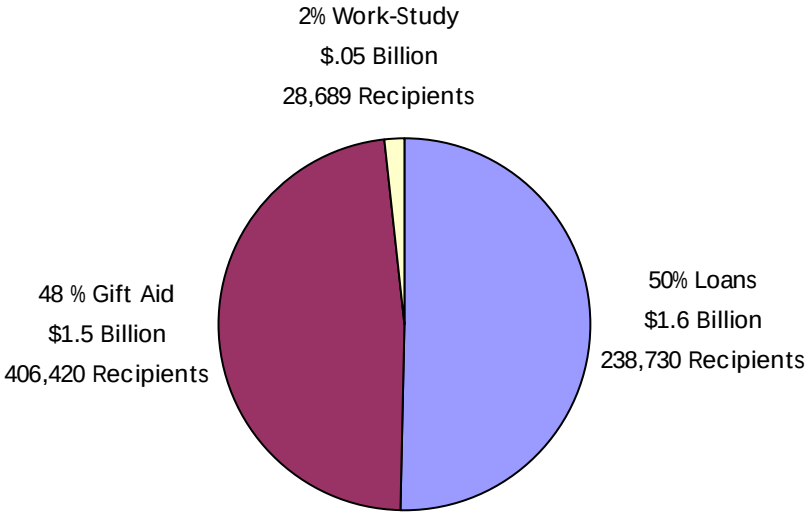
Sources of Aid Distributed by Student Category – FY 2006

The Financial Aid Database divides students[10] into two general categories: "Basic Needy Students" and "Needy Students Using Aid in Part to Replace Family Contribution."

1) *Basic Needy Students* (Figure 4) are those whose resources, including contributions from family income and financial aid, are equal to or less than the cost of attendance. In this category, 82 percent of the students had family incomes of less than $40,000.

A total of 449,771 students, or 77 percent of all students receiving need-based financial aid in Texas, are in this category.

Figure 4: Percentage of Aid Funds by Type for Basic Needy Students,[11] FY 2006

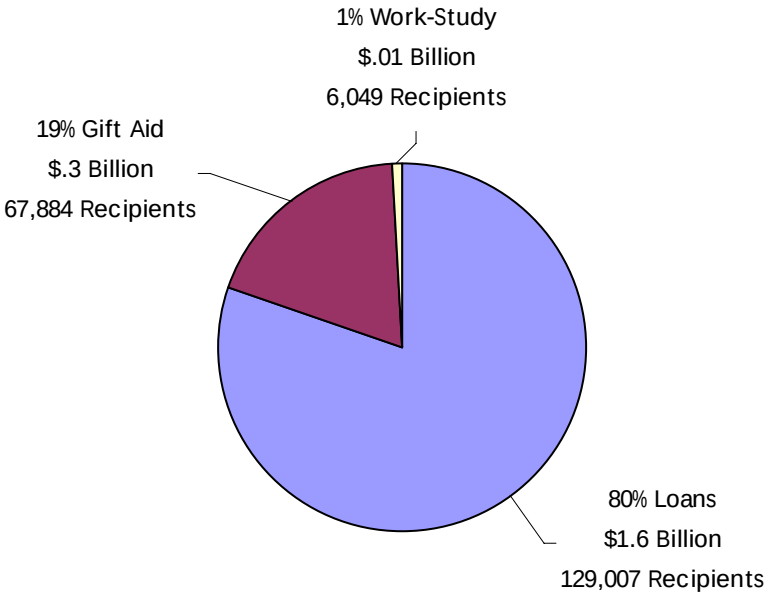


[10] To be included in the Financial Aid Database, students completed a Free Application for Federal Student Aid (FASFA) and accepted and received some type of need-based aid.
[11] Since many students receive assistance through more than one program, the sum of awards indicated in the chart (673,839) exceeds the number of student in this category (449,771).

2) *Needy Students Using Aid, in Part, to Replace Family Contribution.* Figure 5 shows most of the students in this group come from families with moderate to high incomes. As a result, the financial aid system (Federal Methodology) expects families from this group, on average, to provide $12,000 per year more from their family resources than it expects from families in the "Basic Needy Students" group. Unable to provide this amount from their current cash flows, many of the families rely on certain types of aid (primarily unsubsidized student loans) to finance the education.

Of all students receiving need-based financial aid in Texas, 133,044 or 23 percent used at least a portion of their aid to offset demands on family resources. In this category, only 39 percent of the students were from families with incomes less than $40,000/year.

Figure 5: Percentage of Aid Funds by Type for Needy Students Using Aid, in Part, to Replace Family Contribution,[12] FY 2006



[12] Since many students receive assistance through more than one program, the sum of awards indicated in the chart (202,940) exceeds the number of student in this category (133,044).

Financial Aid Received by Student's Home Region – FY 2006

Of the $4.76 billion awarded to students attending institutions of higher education in Texas, more than $4.3 billion was awarded to 548,000 students whose permanent homes were in Texas. The balance of funds went to approximately 35,000 students from other states and countries who are attending college in Texas.

Figure 6 below shows the number of students from each region in Texas receiving some form of student financial aid and Figure 7 shows the amounts students received to help meet the costs of college.

Figure 6: Home Regions and Numbers of Students Receiving Financial Aid

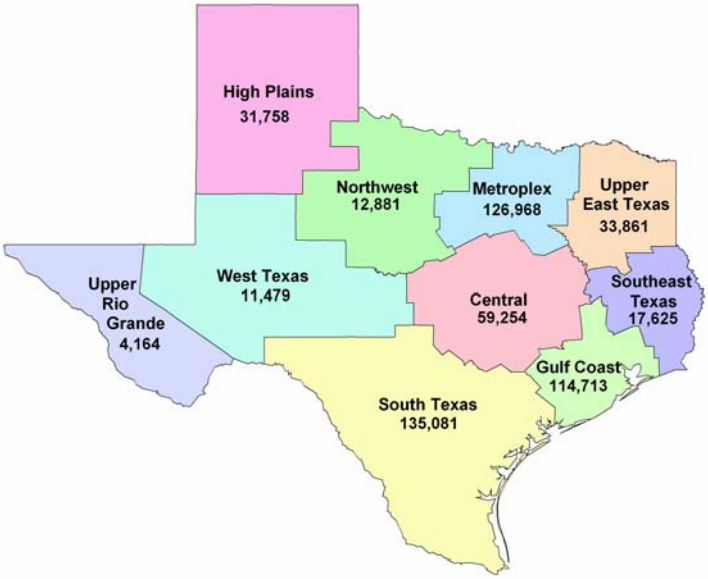


Figure 7: Home Regions and Amount of Aid Disbursed to Students

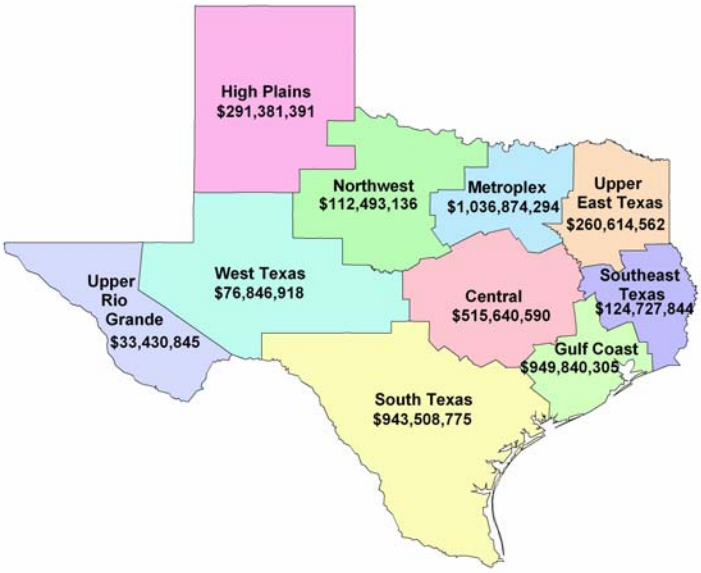


State Need-Based Financial Aid Programs: Awards and Dollars – FY 2006

Table 1 is a summary of the expenditures and number of recipients in FY 2006[13] for the Texas financial assistance programs administered by the Coordinating Board. For a complete list of program eligibility and award amounts, see http://collegefortexans.com/paying/finaidtypes.cfm.

Table 1
State Financial Aid Programs: Awards and Dollars

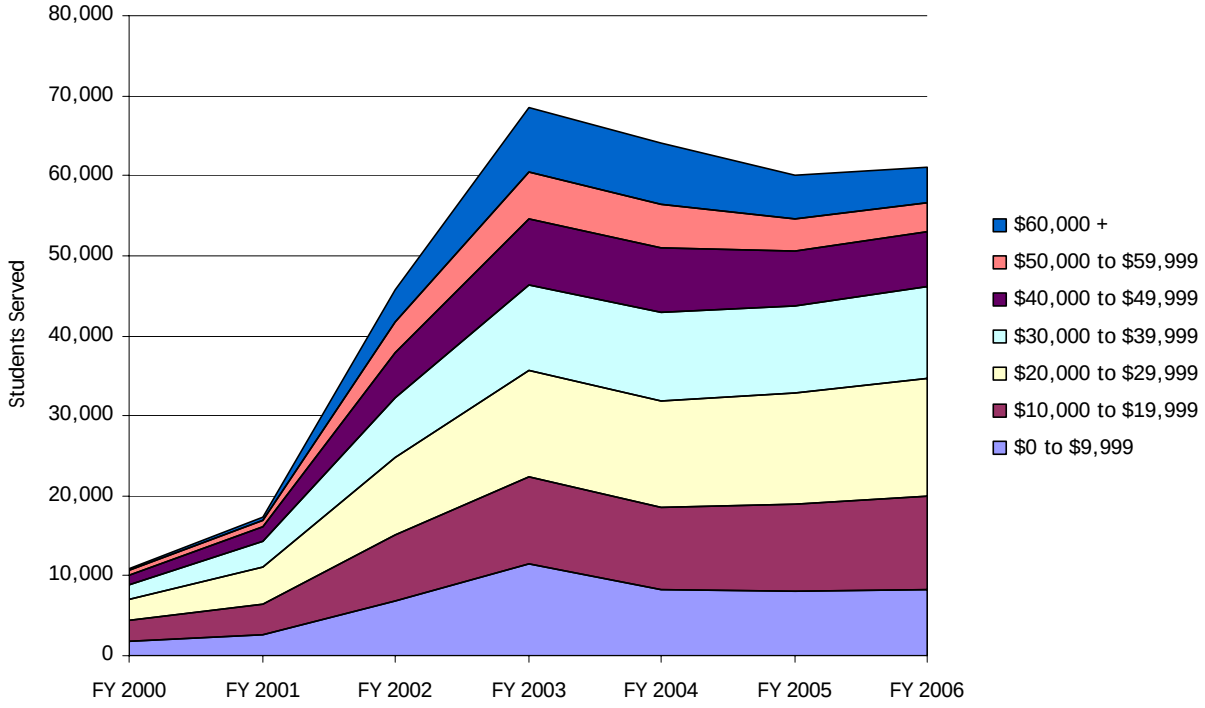
	FY 2006 Number of Recipients	FY 2006 Disbursements per Program
TEXAS Grant Program	61,057	$186,182,180
Tuition Equalization Grant Program	30,035	$87,260,887
Hinson-Hazlewood College Student Loan Program[14]	11,125	$71,772,000
B-on-Time Loan Program[15]	7,384	$26,937,128
Educational Aide Exemption Program [14]	5,841	$10,254,302
Early High School Graduation Scholarship [14, 16]	6,912	$6,244,529
Texas College Work-Study Program	5,378	$5,966,146
Texas Educational Opportunity Grant (formerly TEXAS Grant II)	3,892	$4,252,502
Professional and Vocational Nursing Scholarship Programs	1,017	$948,077
Fifth Year Accounting Student Scholarship [14]	332	$553,391
TANF/AFDC Exemption Program [14]	78	$206,303
License Plate Insignia Scholarship Program [14]	34	$49,822
Texas New Horizons Scholarship Program [14]	2	$5,487
Total	**133,087**	**$400,632,754**

[13] Source: FY2006 Financial Aid Database.
[14] Program data is derived from in-house Coordinating Board reports. Program is not reported separately in the Financial Aid Database Report.
[15] Data is derived from in-house Coordinating Board reports because some loans were awarded to students without need who were not, therefore, included in the Financial Aid Database.
[16] Non need-based Financial Aid Program, i.e., no need-analysis is required.

TEXAS Grant Recipients by Income and Ethnicity, FY 2000 - 2006

Figure 8 illustrates TEXAS Grant recipients by income level since the beginning of the program in FY 2000. In FY 2003, it was fully funded and Figure 8 shows a sharp increase in numbers of students receiving grants.

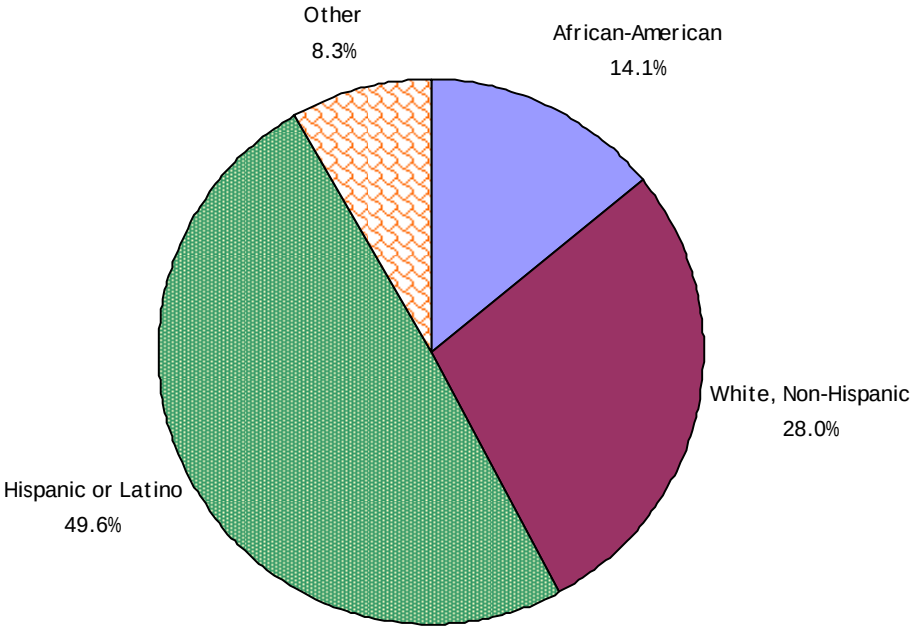
Figure 8: Seven Years of TEXAS Grant Awards by Income Level, FY 2000 - 2006[17]



[17] Sources: Financial Aid Databases FY 2000-2006.

Figure 9 illustrates TEXAS Grant recipients by ethnicity and indicates that many TEXAS Grant awards benefit minority students. Twenty-eight percent of the fall 2005 total enrollment was Hispanic or Latino, but 50 percent of the funds went to these students. African-American students made up 12 percent of the fall 2005 total enrollment but received 14 percent of the funds.[18]

Figure 9: Percentage of TEXAS Grant Recipients by Ethnicity – FY 2006



Ethnicity	Percent of Recipients	Number of Recipients	Percent of Fall 05 Enrollment	Funds Received
African-American	14.1%	8,631	11.2%	$28,262,369
White, Non-Hispanic	28.0%	17,086	51.8%	$54,657,312
Hispanic or Latino	49.6%	30,257	26.2%	$85,247,176
Other	8.3%	5,083	10.8%	$18,015,323

[18] THECB enrollment data, available through www.thecb.state.tx.us/InteractiveTools/PREP/ . "Other" includes Asian or Pacific Islanders, American Indians or Alaskan Natives, International students and students who did not report their ethnic origin.

TEXAS Grant and *Closing the Gaps*

For the state's future economic well-being, Texas must enroll more of its people in higher education and help them acquire critical knowledge and skills. With an undereducated workforce, Texas will be unable to attract, retain and grow businesses and industries offering the best jobs.

A recent study by the Perryman Group, *A Tale of Two State—And One Million Jobs!*[19] speaks to the economic and social benefits to the State if the goals outlined in *Closing the Gaps by 2015* are achieved. The study points out that Texas will be "ok" if those goals are not reached. But it also asks what kind of Texas do we want? The study emphasizes that the gains that can be made by investing in higher education and achieving the goals of *Closing the Gaps* are remarkable – and TEXAS Grant is a big part of that investment.

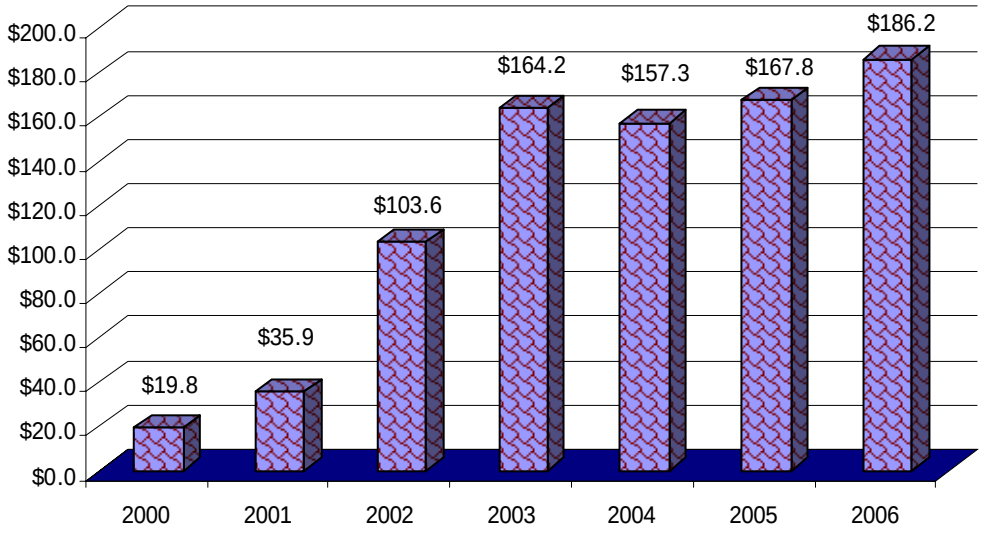
Financial aid will play a vital role in allowing access to higher education for hundreds of thousands of Texas students over the next decade. Demographic trends show that most of these new students will come from families with few financial resources and no history of participation in higher education.[20] To attract these students to higher education, financial aid will have to be available.

The *Towards EXcellence, Access and Success (TEXAS) Grant* plays an essential part in this effort. The TEXAS Grant is the state's largest financial aid program. Figure 10 shows the growth in program funding since its inception in FY 2000. The TEXAS Grant Program, if fully funded, can provide reliable assistance to low-income students with unmet financial need and help achieve the goals set out in *Closing the Gaps*.

At FY 2007 funding levels (Figure 11), the number of new students unable to enter the TEXAS Grant program will equal 53,000 in FY 2008, rising to more than 83,000 in FY 2012.[21]

With an additional investment of approximately $200 million per year over each previous year's expenditures, the TEXAS Grant Program could keep pace with increased demand as the state attains its goal of closing the gaps in participation. At this increased level of investment, the state would provide grants to approximately 343,000 more students in the period of FY 2008 - FY 2012 than it could with constant funding at the FY 2007 level.

Figure 10: TEXAS Grant Expenditures, FY 2000 - 2006[22]



[19] A Tale of Two States—And One Million Jobs!, An Analysis of the Economic benefits of Achieving the Future Goals of the "Closing the Gaps" Initiative of the Texas Higher Education Coordinating Board," March 2007
[20] Texas State Data Center and Office of the State Demographer, http://txsdc.utsa.edu/.
[21] TEXAS Grant projections, calculated in the Student Services Division, THECB, March 2006.
[22] Source: Financial Aid Databases FY 2000-2006. The $186.2 million figure in 2006 includes $17.8 million in TEXAS Grants funded through the Tuition Equalization Grant Program.

Figure 11: Impact of Constant-Level Funding on TEXAS Grant Recipient Pool, Projections FY 2007-2011 [23]

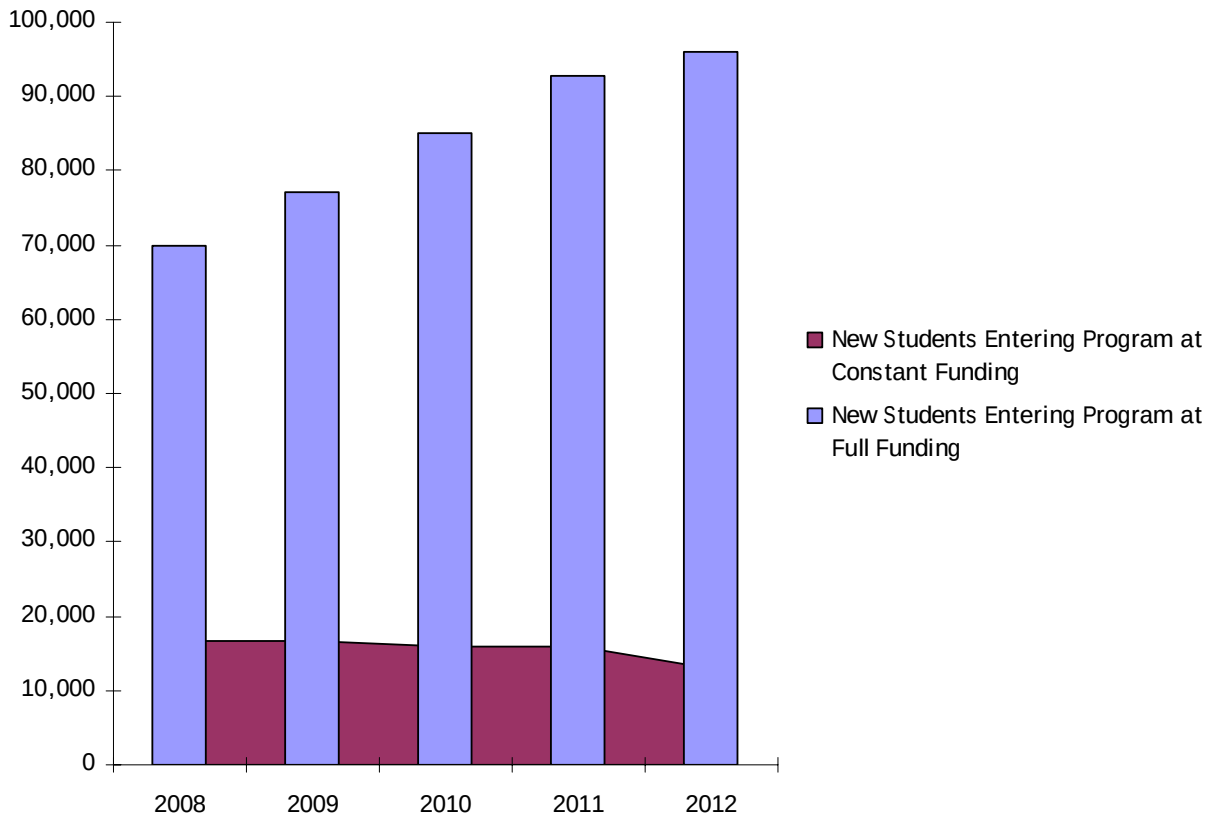


Figure 11 shows that although the number of students *eligible* to enter the TEXAS Grant Program is projected to grow significantly by 2012, the actual number of *recipients* is expected to go down if funding is held constant. Rising costs and inflation will reduce the buying power of the Grant funds, causing the number of recipients to drop by more than 3,500 if funding is not increased.

Table 1 demonstrates that with full funding, the TEXAS Grant Program could help Texas meet the goals set out in *Closing the Gaps* by providing assistance to approximately 197,000 more students in 2011.

Table 1
TEXAS Grant funding

	Full Funding	Constant Funding	Shortfall	Students Unable to Enter Program
2008	$348,861,360	$166,727,774	$182,133,586	53,290
2009	$548,184,571	$167,587,545	$328,058,306	60,491
2010	$754,197,375	$167,465,858	$586,731,517	69,151
2011	$975,263,300	$166,849,461	$588,420,984	76,906
2012	$1,186,049,054	$166,063,228	$1,019,985,826	83,098

[23] THECB June 2006. Projections for 2006 and beyond are based on serving all students with financial need.

Institutional View of Student Aid in Texas – FY 2006

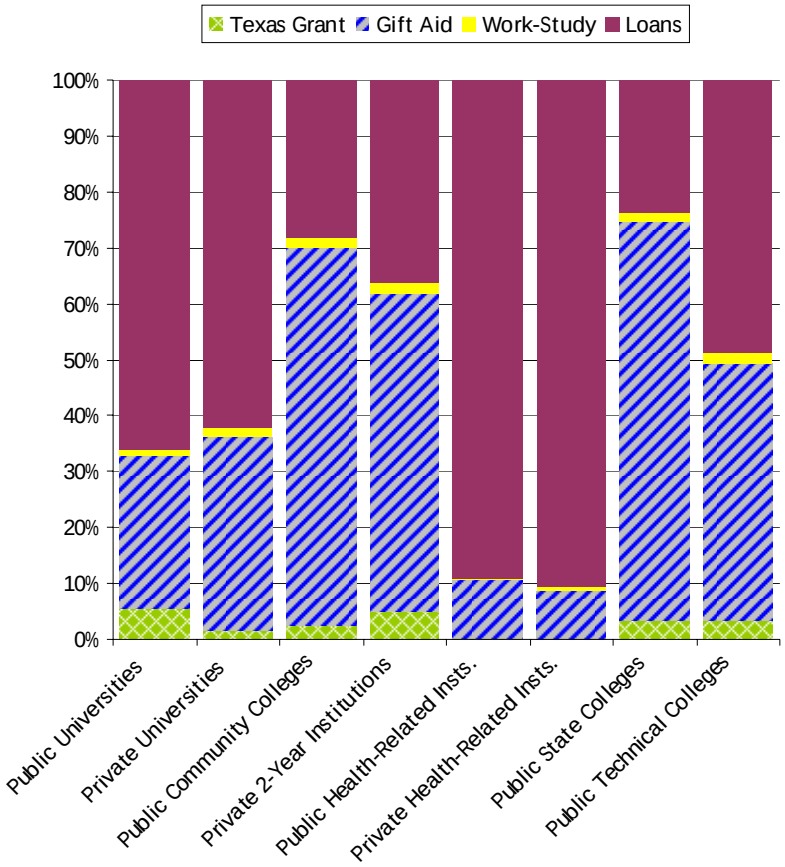
Figure 12 illustrates the distribution of aid by type (loans, work-study, and gift aid) for the various types of Texas public and private nonprofit institutions submitting data for this report. Although it is a type of gift aid, TEXAS Grant is shown separately because of state interest in this program.

The relative reliance on gift aid and loans at public and private universities is similar, in spite of the fact that on average, private universities' annual costs exceed costs of their public counterparts by approximately $6,600.[24]

Students at two-year institutions (public community colleges and state colleges, in particular) appear to avoid loans and a higher percent of them work while going to college compared to their university counterparts. As a result, gift aid represents a relative higher share of the aid.

As the cost of attendance rises for both public and private universities and health-related institutions, loans continue to account for the majority of financial aid.

Figure 12: Percentage of Financial Aid Awarded by Aid Type and Type of Institution



[24] Appendix E: Institutional Budgets for FY 06.

Figure 13 shows that students attending Texas public universities received the greatest share of aid, and that $1.7 billion (66 percent) of this amount was in the form of student loans. At community colleges, only $.21 billion (28 percent) of financial aid came in the form of loans. Table 2 includes the actual dollars distributed by type and sector for FY 2006.

Figure 13: Total Financial Aid Awarded by Type of Institution (in Millions of Dollars)

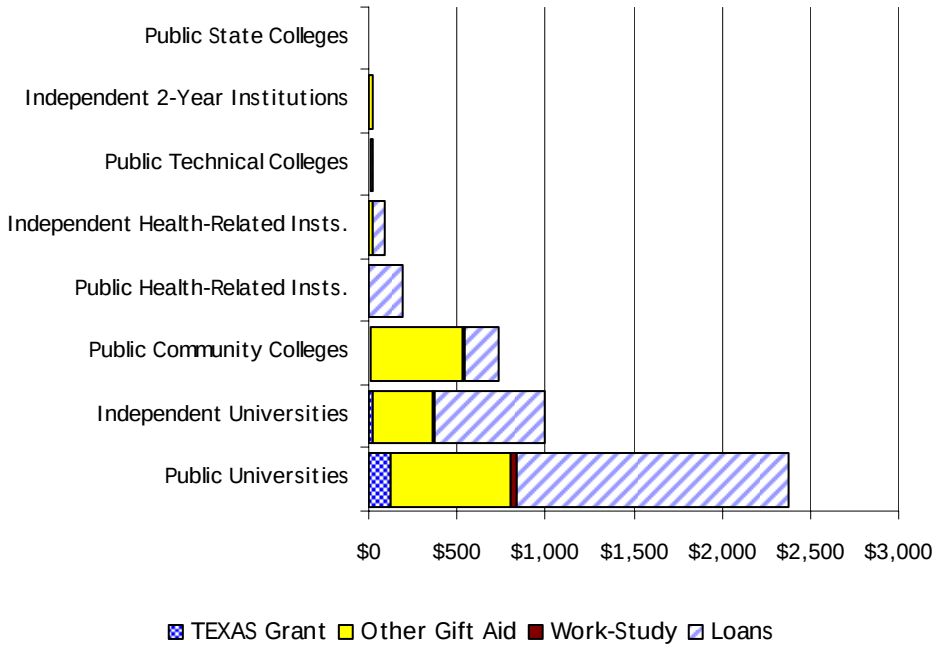


Table 2
Total Financial Aid Awarded by Type of Institution (in Millions of Dollars)

Texas Institution	TEXAS Grant	Other Gift Aid	Work-Study	Loans	Total	Number of Recipients
Public Universities	$148.3	$719.0	$28.6	$1,745.0	$2,640.9	270,434
Independent Universities	$17.7	$357.3	$17.0	$641.8	$1,033.8	68,968
Public Community Colleges	$17.8	$495.5	$14.2	$206.6	$734.1	218,141
Public Health-Related Institutions	$0.3	$23.8	$0.3	$201.5	$225.9	502
Independent Health-Related Insts.	$0.0	$5.9	$0.7	$62.4	$68.9	9,501
Public Technical Colleges	$1.4	$19.6	$0.8	$20.8	$42.6	2,317
Independent 2-Year Institutions	$0.2	$1.8	$0.1	$1.2	$3.2	3,946
Public State Colleges	$0.5	$10.8	$0.2	$3.6	$15.1	9,006
Total	$186.2	$1,633.7	$61.8	$2,882.8	$4,764.5	582,815

Financial Aid in Texas Compared to Rising Costs, FY 2001 - 2006

Figure 14: Rising Costs and Financial Aid Resources (Millions)

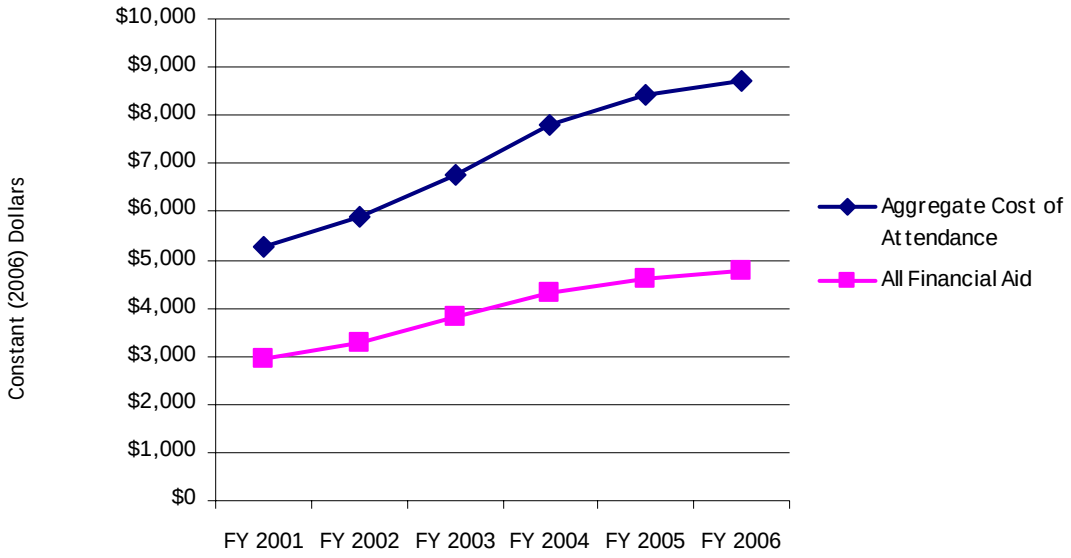

Figure 14 above shows the aggregate costs of attending college faced by students receiving need-based aid during the past five years, compared to the total amount of financial aid they received. The trend is not positive. Aid as a percentage of the cost of attendance has been slowly decreasing, leaving more and more of the financial burden of college on students and their families at a time when the state is trying to increase enrollments. In FY 2001 aid represented 56.14 percent of the costs faced by financial aid recipients. As of FY 2006 the figure had dropped to 54.69 percent. But, more significant is the trend in the difference between the cost of attendance and the aid received by students. In FY 2001, the difference was $2,308 million in constant 2006 dollars. By FY 2006, that difference had grown to $3,947 million. Growth in financial aid is not keeping up with growth in costs.

Table 3
Aggregate Costs of Attendance vs.
Aggregate Financial Aid Funds
(Constant 2006 dollars)

	Aggregate Cost of Attendance (in Millions)	All Financial Aid (in Millions)	Aid as Percent of Cost
FY 2001	$5,262	$2,954	56.14%
FY 2002	$5,898	$3,297	55.89%
FY 2003	$6,782	$3,799	56.01%
FY 2004	$7,796	$4,306	55.23%
FY 2005	$8,426	$4,623	54.87%
FY 2006	$8,712	$4,765	54.69%

Financial Aid Growth in Texas: Grant vs. Loan Programs, FY 2001 - 2006

Figure 15: Six Years of Financial Aid in Texas, FY 2001 - 2006

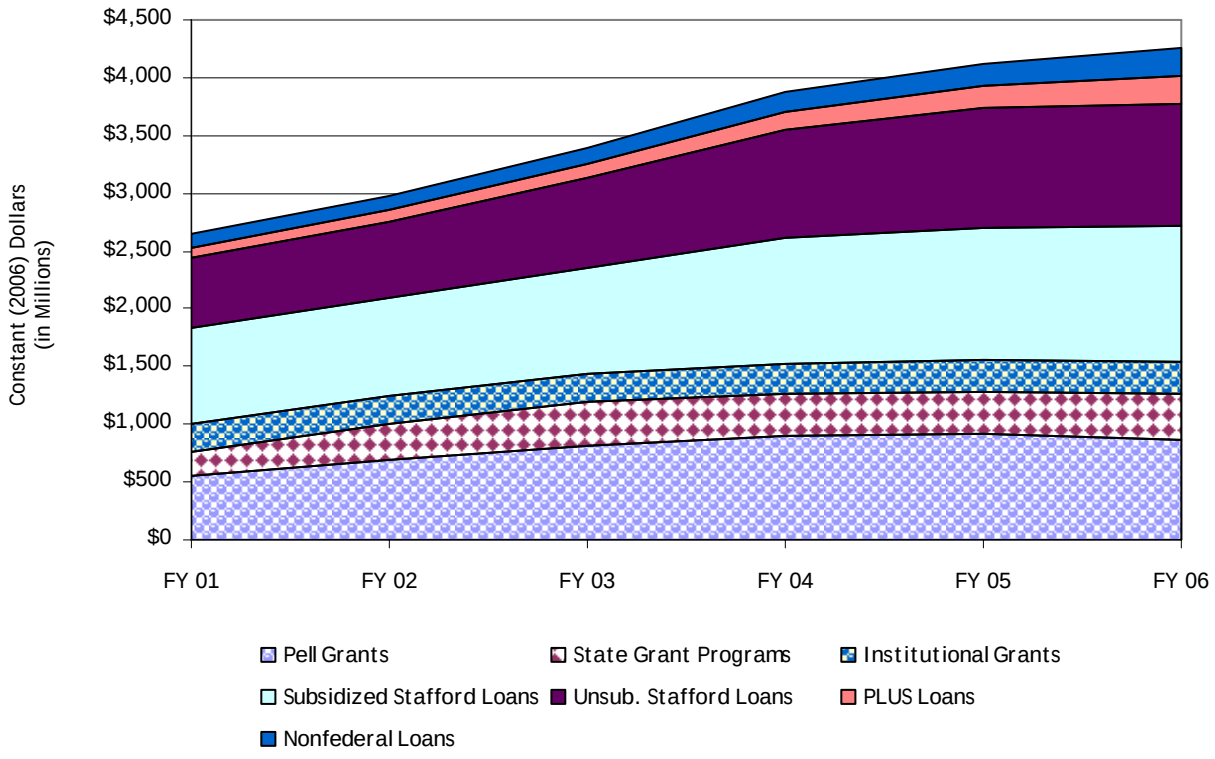

Figure 15 above shows that in the past six years Texas students have received additional financial aid to help finance their education. Loans (the solid-colored sections) constitute an ever-increasing majority of the available funds. Gift aid (the checkered sections) grew between FY 2001 and FY 2003, primarily as a result of growth in TEXAS Grant funding, but has since leveled off. Recent increases in funding for TEXAS Grants and the Tuition Equalization Grant Program have been partially offset by decreases in the amount of Federal Pell Grants received by Texas students.

As Figure 16 on the following page shows, Texas is not unique in its dependence on loans for financing the cost of education.

National Trends in Student Aid, FY 2001 - 2006

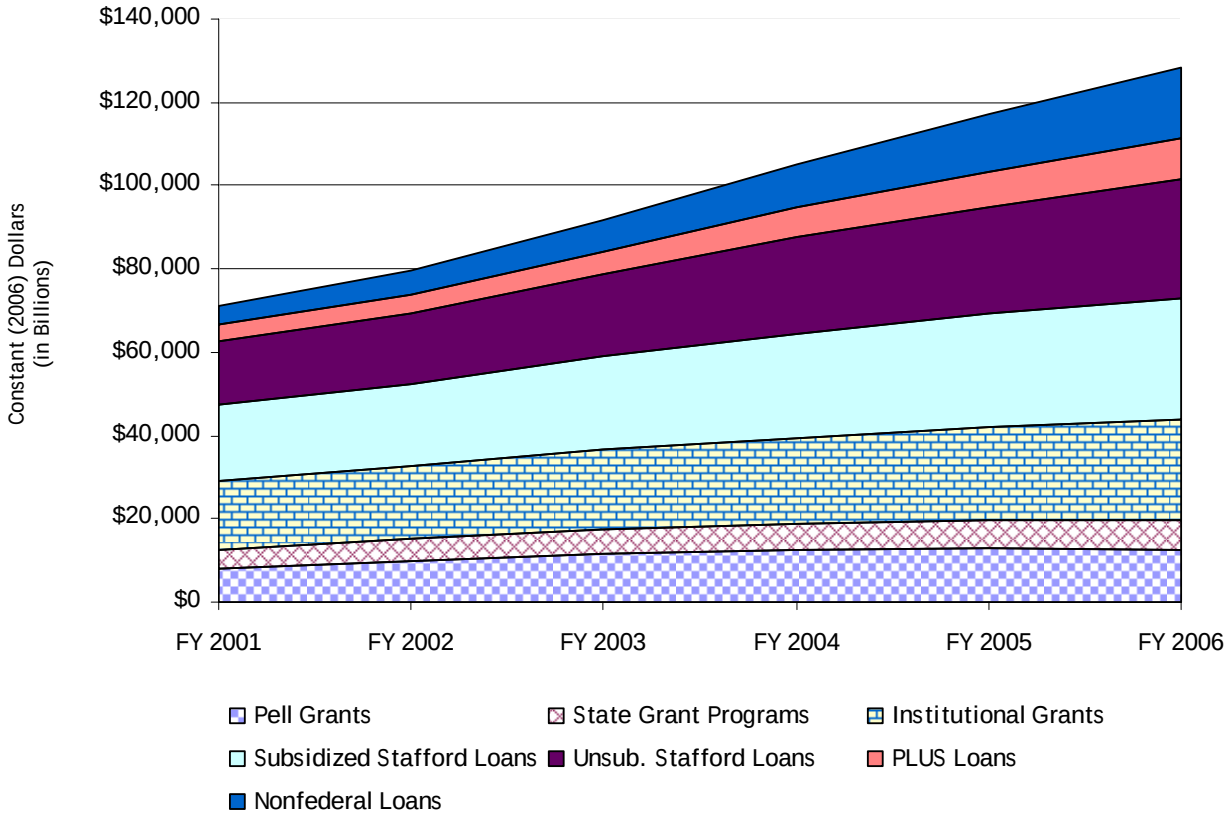
As in Texas, the national view of student aid shows growth, but not in all programs. Overall funding for postsecondary education during the five-year period increased by almost 71 percent.

Figure 16 shows that nationwide, amounts for Unsubsidized Stafford loans and nonfederal loans have increased more than any other type of student aid. Parent Loans for Undergraduate Students (PLUS) show the fastest growth trend among the federal programs. Federal loans now constitute 47 percent of total aid to undergraduate and graduate students nationally.

Institutions supply 42 percent of all gift aid in the nation, which places these organizations as the largest source of this type of aid, surpassing even the Federal Pell Grant Program.

Nationwide, state grant programs have remained relatively flat for this period.

Figure 16: Six Years of Financial Aid Growth in the Nation, FY 2001 - 2006 [25]



[25] *College Board: Trends in Student Aid, 2006*, http://collegeboard.com.

Conclusions: Financial Aid and the Value of an Education

Figure 17: Expected Lifetime Earnings Relative to High School Graduates, by Education Level [26]

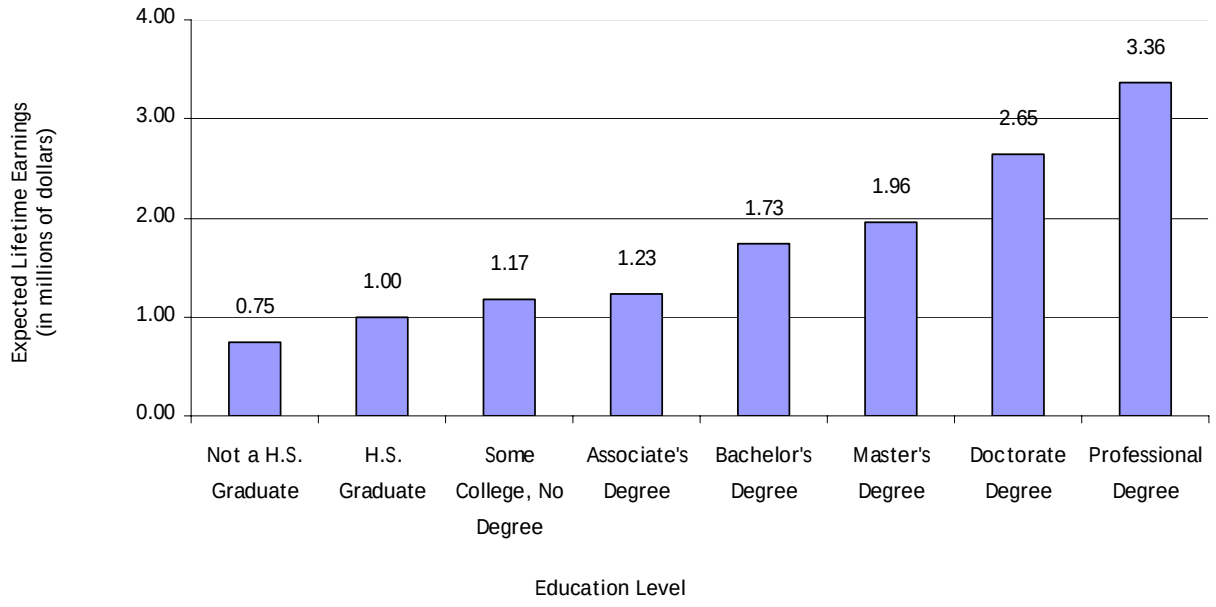


Figure 17 above shows average lifetime earnings at the specific education level compared to average lifetime earnings of high school graduates.[26]

According to "A Tale of Two States—And One Million Jobs!," a report issued in 2007 by The Perryman Group, these earnings gaps are expected to grow:

- The shift to a knowledge-based economy emphasizing technology has increased the educational requirements of many industries.
- A decrease in the relative importance of labor unions and high-paying manufacturing jobs for those with low levels of education (partly a consequence of global competition) has further widened the gap between earnings for those with a high school diploma and those with some form of higher education.
- In the early 1980s, the average earnings of a full-time male worker between the ages of 35 and 44 with a bachelor's degree were 38% higher than one with a high school diploma. In the early 2000s, the difference had climbed to 94%.[27]

The $4.76 billion in student financial aid awarded in Texas in 2005-2006 may create the illusion that there is adequate assistance for higher education. But most of this aid was acquired by individuals accepting loans. For the lowest-income families, an increasing loan burden may appear unsustainable.

Decreasing the higher education financial burden of the neediest families through prudent investment in need-based aid such as the TEXAS Grant Program can help students afford college and will act as a symbol of our state's commitment to higher education for all Texans.

[26] *College Board: The Benefits of Higher Education for Individual and Society, 2004*, http://collegeboard.com, page 11.

[27] "*A Tale of Two States—And One Million Jobs!, An Analysis of the Economic benefits of Achieving the Future Goals of the "Closing the Gaps" Initiative of the Texas Higher Education Coordinating Board*," March 2007, page 17.

Appendix A: Data Restrictions and Variables

The limitations of the data used in this report are as follows:

1. The Texas financial aid database does not include information on merit-based aid, such as academic or athletic scholarships, unless students who received such aid *also* received some type of need-based aid. Students on merit-based aid alone are not included in this report. Therefore, the total amount of gift aid awarded to students in Texas is understated in this report.

2. The Texas Financial Aid Database does not include information on students attending for-profit institutions in Texas. It only includes data for students attending non-profit public or independent institutions in the state.

3. The data only include student loans *accepted* rather than funds offered. Some students decline some or all of the student loan funds offered to them and instead choose to work, reduce costs, or find alternative means of support.

4. The data only include work-study funds that were *earned* rather than funds offered. Some students decline work-study awards and choose to take additional loans, reduce costs or find alternative means of support.

5. Since most tuition exemption and waiver programs are not need-based, the Financial Aid Database does not accurately reflect the number or value of the exemptions and waivers awarded to students attending public institutions of higher education. It only includes data for such students who also received some type of need-based aid.

6. Students who were offered *only* loans and declined to accept those loans are not reflected in the total number of students. Students who received need-based gift aid but declined loans are included in the total number of students since they received the gift aid.

7. National data is based on the federal academic year (July 1, 2005 to June 31, 2006). State data is based on each institution's academic year.[28]

8. Neither state nor national data capture information on:
    a. Student wages that are not a result of formal work-study programs;
    b. Consumer loans used to finance education (only educational loans are included);
    c. Credit card debt used to finance education.

[28] An informal survey conducted by Coordinating Board staff in fall 2003 indicated that 72.1 percent of the institutions define their academic year in terms of fall, spring and summer, and 18.3 percent counted summer as the beginning of the year, followed by fall and spring. The balance used other variations.

Appendix B: Needs Analysis and Awarding Methodology [29]

Students must first establish financial eligibility to receive aid from most federal and state financial aid programs The application form used for this purpose is called the Free Application for Federal Student Aid (FAFSA).

The FAFSA collects demographic, income, and asset information from aid applicants and their families. This information is used to estimate the amount, called the Expected Family Contribution (EFC) that students and their families are expected to contribute towards postsecondary education expenses.

The EFC is determined through the use of a need analysis formula called the Federal Methodology (FM). The first step under the FM is to determine the student's financial dependency status. This step identifies the scope of information required to be provided on the FAFSA and the family resources to be considered in calculating the EFC.

If students are considered financially independent, their parents are not expected to pay any portion of their postsecondary education expenses and no parental information is required on the FAFSA. Students are automatically considered financially independent if they are 24 years of age or older, are married, have dependents, are orphans or wards of the court, or if they are in graduate or professional school. All other students are considered financially dependent. Their parents are expected to contribute some amount—as calculated by the FM—to the financing of their child's education.

Not all of the family's income and assets are considered. There are allowances that protect a portion of income and assets from the need analysis calculations. For example, home equity is excluded from the FAFSA calculations. Family farms and assets such as retirement savings and a portion of education savings are also exempt. Allowances for taxes and non-education related living costs are protected income. The formula takes into consideration the number of financially dependent children in the household and the number of children currently enrolled at least half time in postsecondary education, as well as several other financial and non-financial circumstances.

Families with less than $50,000 in adjusted gross income who meet certain tax-filing requirements may qualify for the simplified needs test, which excludes all assets from consideration.

Financial aid administrators use the EFC and other information to determine which students will receive federal student aid. A student is eligible to receive federal student aid only if his or her EFC is less than the total cost of attendance. The cost of attendance includes tuition and fees, estimated living expenses, books and educational supplies, transportation to and from the postsecondary education institution, and other miscellaneous expenses.

Unmet need for Private Health-Related Institutions is negative as a result of educational loans used to offset family contributions. To calculate unmet need, the Financial Aid Database subtracts all resources from the cost of attendance. When a loan is used to replace all or part of family contribution, the need calculation includes the EFC estimate plus the replacement loan, leaving a negative balance.

FY 2006

Unmet need for Private Health-Related Institutions is negative as a result of educational loans used to offset family contributions. To calculate unmet need, the Financial Aid Database subtracts all resources from the cost of attendance. When a loan is used to replace all or part of family contribution, the need calculation includes the EFC estimate plus the replacement loan, leaving a negative balance.

Appendix K: Glossary

Appendix K: Glossary [1]

Assets: Cash on hand in checking and savings accounts; trusts, stocks, bonds, other securities; real estate (excluding home), income-producing property, business equipment, and business inventory. Considered in determining Expected Family Contribution (EFC).

Byrd Scholarship: A federally sponsored, merit-based scholarship for outstanding high school students.

Cost of Attendance (COA): Generally, this includes the tuition and fees normally assessed a student, together with the institution's estimate of the cost of room and board, transportation and commuting costs, books and supplies, and miscellaneous personal expenses. In addition, student loan fees, dependent care, reasonable costs for a study abroad or cooperative education program, and/or costs related to a disability may be included, when appropriate. Also referred to as "cost of education" or "budget."

Dependent Student: A student who does not qualify as an independent student and whose parental income and asset information is used in calculating an Expected Family Contribution (see Independent Student).

Direct PLUS Loan: Long-term loans made available to parents of dependent students. Interest rates are linked to 52-week Treasury bill rates, but may not exceed 9%. May be used to replace EFC; amount borrowed is limited to the cost of attendance minus estimated financial assistance.

Direct Subsidized and Direct Unsubsidized Loans: Long term, low-interest loans administered by the Department of Education and institutions. Variable interest rate not to exceed 8.25%. Direct Unsubsidized Loans can be used to replace EFC.

EFC: See Expected Family Contribution.

Expected Family Contribution (EFC): The amount a student and his or her family are expected to pay toward the student's cost of attendance as calculated by a Congressionally-mandated formula known as Federal Methodology. The EFC is used to determine a student's eligibility for the student financial assistance programs.

FAFSA: See Free Application for Federal Student Aid.

Federal Methodology (FM): See Federal Need Analysis Methodology.

Federal Need Analysis Methodology: A standardized method for determining a student's (and family's) ability to pay for postsecondary education expenses; also referred to as Federal Methodology (FM). The single formula for determining an Expected Family Contribution (EFC) for Pell Grants, campus-based programs, FFEL programs, and Direct Loan program; the formula is defined by law.

Federal Pell Grant: A federal grant program for needy postsecondary students who have not yet received a baccalaureate or first professional degree; administered by the U.S. Department of Education.

Federal Perkins Loan: One of the campus-based programs; a long term, low interest loan program for both undergraduate and graduate students at a current interest rate of 5%. May also be called the Carl D. Perkins National Direct Student Loan Program.

Federal PLUS Loan (FPLUS): Long-term loans made available to parents of dependent students. Interest rates but may not exceed 9%. May be used to replace EFC; annual amount borrowed limited to the cost of attendance minus estimated financial assistance.

[1] Adapted from National Association of Student Financial Aid Administrators, obtained at http://www.nasfaa.org/SubHomes/DoItAffordIt/glossary.asp

Federal Stafford Loan (subsidized and unsubsidized): Long term, low interest loans administered by the Department of Education through private guarantee agencies. Formerly known as Guaranteed Student Loans (GSLs). Variable interest rate, not to exceed 8.25%. Unsubsidized Federal Stafford Loans may be used to replace EFC.

Federal Supplemental Educational Opportunity Grant (FSEOG): One of the campus-based programs; grants to undergraduate students of exceptional financial need who have not completed their first baccalaureate degree and who are financially in need of this grant to enable them to pursue their education. Priority for FSEOG awards must be given to Federal Pell Grant recipients with the lowest EFCs.

Federal Work-Study Program (FWS): One of the campus-based programs; a part-time employment program which provides jobs for undergraduate and graduate students who are in need of such earnings to meet a portion of their educational expenses.

Financial Aid Award: An offer of financial or in-kind assistance to a student attending a postsecondary educational institution. This award may be in the form of one or more of the following types of financial aid: repayable loan, a non-repayable grant and/or scholarship, and/or student employment.

Financial Need: The difference between the institution's cost of attendance and the family's ability to pay (i.e., Expected Family Contribution). Ability to pay is represented by the expected family contribution for federal need-based aid and for many state and institutional programs.

Free Application for Federal Student Aid (FAFSA): The financial aid application document completed by the student, and the student's parents if applicable, that collects household and financial information. The FAFSA is the foundation document for all federal need analysis computations and database matches performed for a student.

Gift Aid: Educational funds such as grants or scholarships that do not require repayment from present or future earnings. See Grant

Grant: A type of financial aid that does not have to be repaid; usually awarded on the basis of need, possibly combined with some skills or characteristics the student possesses. Also see Gift Aid.

Income: Amount of money received from any or all of the following: wages, interest, dividends, sales or rental of property or services, business or farm profits, certain welfare programs, and subsistence allowances such as taxable and non-taxable social security benefits and child support.

Independent Student: A student who:(a) will be 24 years of age by December 31, 2004, or who: (b) is an orphan or a ward of the court; (c) is a veteran; (d) is married or is a graduate or professional student; (e) has legal dependents other than a spouse; or (f) presents documentation of other unusual circumstances demonstrating independence to the student financial aid administrator.

Loan: An advance of funds evidenced by a promissory note and requiring the recipient to repay the specified amount(s) under prescribed conditions.

Merit-based Aid: Student assistance awarded because of a student's achievement or talent in a particular area, such as academics, athletics, music, etc.

Need: See Financial Need.

Need Analysis: A system by which a student applicant's ability to pay for educational expenses is evaluated and calculated. Need analysis consists of two primary components: (a) determination of an estimate of the applicant's and/or family's ability to contribute to educational expenses; and (b) determination of an accurate estimate of the educational expenses themselves.

Need Analysis Formula: Defines the data elements used to calculate the expected family contribution (EFC); there are two distinct formulas: regular and simplified. The formula determines the EFC under the Federal Need Analysis Methodology.

Need-based Aid: Student assistance awarded because a student's financial circumstances would not permit him or her to afford the cost of a postsecondary education.

Non Need-based Aid: Aid based on criteria other than need, such as academic, musical, or athletic ability. Also, refers to federal student aid programs where the expected family contribution (EFC) is not part of the need equation.

Parent Contribution: A quantitative estimate of the parents' ability to contribute to postsecondary educational expenses.

Scholarship: A form of financial assistance that does not require repayment or employment and is usually made to students who demonstrate or show potential for distinction, usually in academic performance.

Simplified Needs Test: An alternate method of calculating the expected family contribution for families with adjusted gross incomes of less than $50,000, who have filed, or are eligible to file, an IRS Form 1040A or 1040EZ, or are not required to file an income tax return. Excludes all assets from consideration.

Student Aid Report (SAR): The official notification sent to a student as a result of the Central Processing System (CPS) receiving an applicant record (via FAFSA) for the student. The SAR summarizes applicant information, an Expected Family Contribution for the student, and displays other special messages related to the student's application. In some instances the SAR may need to be submitted to the financial aid office at the school the student plans to attend, but only if the school requests it.

Student Contribution: A quantitative estimate of the student's ability to contribute to postsecondary expenses for a given year.

Unmet Need: The difference between a student's total cost attendance at a specific institution and the student's total available resources.

William D. Ford Federal Direct Loan (Direct Loan) Program: The collective name for the Direct Subsidized, Direct Unsubsidized, Direct PLUS Loan, and Direct Consolidation Loan Programs. Loan funds for these programs are provided by the federal government to students and parents through postsecondary institutions that participate in the program. With the exception of certain repayment options, the terms and conditions of loans made under the Direct Loan Program are identical to those made under the FFEL program.

Acronyms Commonly Used in Financial Aid Administration

COA: Cost of Attendance
EFC: Expected Family Contribution (also FC, Family Contribution)
FAFSA: Free Application for Federal Student Aid
FM: Federal Methodology
FPLUS: Federal PLUS (Parent) Loan
FSEOG: Federal Supplemental Educational Opportunity Grant
FWS: Federal Work-Study
PC: Parental Contribution
SAR: Student Aid Report
SC: Student Contribution
