

Allocation of *Closing the Gaps* Participation Goals for 2015 to Institutions and Regions by Ethnicity Summary, October 2008

Closing the Gaps by 2015 (CTG) set a goal of 1,650,000 students enrolled in higher education in Texas by 2015 at the undergraduate and graduate levels, as well as goals for each ethnic/racial group. These goals were based on a 5.7 percent participation rate for each group's projected population, as computed from the Texas State Data Center's (TSDC) "2000-2002" migration scenario population projections.

In order to guide fulfillment of these CTG goals, the Coordinating Board (CB) has projected where these students will reside and where they will enroll. This report describes the methodology used to allocate the 2015 student population to higher education regions and institutions, *based on the assumption that the 2015 CTG goals will be met*. The projection focuses primarily on Texas residents enrolling in public higher education institutions in 2015.

One purpose of the projections is to highlight the magnitude of differences between 2007 enrollments and the 2015 goals. Another purpose of the projections is to help institutions and regions plan for future enrollments. The analysis assumes that students will attend the same set of institutions that currently exists. The calculation was done in two steps:

1. The student population in 2015 was estimated for students' region of residence, ethnicity, and type of institution attended, using regional population projections for 18-35 year olds. The population sums to the 2015 CTG goals.
2. The students were allocated to Texas public institutions and higher education regions, by ethnicity, based on college-going patterns in 2007.

Table 1 shows the 2015 CTG participation goals. The fifth row shows the goals for Texas residents attending public institutions in 2015, when independent/career enrollments and non-residents are excluded. To further break out the goals by type of institution, it was assumed that 70 percent of the enrollment growth from 2007 to 2015 for each ethnic group would be at public two-year institutions, 27.5 percent at public four-year institutions, 1 percent at public health-related institutions, and the remainder (1.5 percent) at independent and career institutions. These breakouts of growth are shown in the last three rows of Table 1.

Table 1: 2015 CTG Participation Goals by Ethnicity and Institution Type

Type of Enrollment	White	African American	Hispanic	Other	Total
2015 Statewide goal	671,300	172,700	676,100	129,900	1,650,000
2015 Independent enrollment	86,813	20,164	33,340	18,685	159,002
Projected 2015 public enrollment	584,487	152,536	642,760	111,215	1,490,998
2015 Nonresident enrollment	21,088	6,124	6,538	45,222	78,972
Public institutions 2015 resident goal	563,399	146,412	636,222	65,993	1,412,026
2007 Texas residents at publics	516,103	119,423	309,500	77,176	1,022,202
Change 2007 to 2015	47,296	26,989	326,722	-11,183	389,824
Public institutions goals: number and percent of total 2007 to 2015 enrollment change					
Two-year institutions (70%)	33,611	19,180	232,188	-7,947	277,032
Universities (27.5%)	13,205	7,535	91,217	-3,122	108,835
Health-related institutions (1%)	480	274	3,317	-114	3,957

The public institution estimates by type of institution from Table 1 were used to allocate numbers of students, by region of residence, for 2015. This was calculated using the regional distribution of the 18 to 35 year-old Texas population as a proxy for the distribution of the resident student population.

Table 2 shows TSDC projections of 18 to 35-year olds for 2015, by region. (See the Appendix for TSDC projections for 2007 and 2015, by ethnicity.) The sum of the regional values was controlled to the statewide CTG goal of 1,412,026 students by multiplying each value by the factor $1,412,026 / 7,435,958$, a procedure known as “raking.” The controlled values are shown in the last column of Table 2 and of Table 3.

Table 2: Derivation of 2015 Resident Student Population Controlled to CTG Enrollment Goal

Region of Residence	TSDC Projected 18 to 35-Year Olds in 2015	Values Controlled to CTG Statewide Enrollment Goal
1	238,792	45,345
2	147,498	28,009
3	2,063,480	391,837
4	279,458	53,067
5	206,217	39,159
6	1,828,483	347,213
7	881,581	167,405
8	1,395,115	264,921
9	147,622	28,032
10	247,712	47,038
Total	7,435,958	1,412,026

Table 3 was derived using an iterative raking procedure, known as iterative proportional fitting. This procedure found the unique set of table entries that simultaneously summed to new column and row totals while preserving the “structure” of 2007 enrollments by ethnicity and type of institution. The results in Table 3 are estimates of the fall 2015 population of Texas residents enrolled in public higher education, assuming the CTG goals will be met.

Table 4 shows the expected changes in resident student population at public institutions from 2007 to 2015. It indicates that an additional 389,824 students will be enrolled. Some 326,722 of these additional students will be Hispanic, an increase of 106 percent. The increase in Hispanic students will be far greater than the 23 percent (26,989) growth in African American students and 9 percent (47,296) growth in white students. The dramatic increase in projected Hispanic participation is attributable to greater increases in the college age population than for African Americans and whites and to the increased participation rates reflected in the CTG goals.

To allocate the students in Table 4 to higher education institutions, Texas resident students were assumed to go from their region of residence to each public institution in 2015 in the same pattern as in fall 2007, by ethnicity. This assumption is made because most Texas institutions are regional in nature and draw their student bodies primarily from their surrounding area. This is particularly true for community colleges. The Texas resident enrollment allocated to each institution, by ethnicity, is the sum of the expected enrollments coming from each of the ten regions, by ethnicity.

Two final adjustments were made to reach total enrollment projections. Non-Texas residents equal to those enrolled in fall 2007 were added to the 2015 Texas resident enrollment for each institution.

Then an adjustment was made because of enrollment caps at The University of Texas at Austin and Texas A&M University. Their projected enrollments in excess of the caps were allocated to the seven emerging research universities using a raking procedure.

To aid in using these data for reviewing and revising institutional CTG targets, institutional allocations are displayed in Tables 5 to 7 for four-year, two-year, and health-related public institutions, respectively. Table 8 shows the totals of data from Tables 5 to 7, by region and statewide.

A more extensive description of the methodology and additional tables are available at: <http://www.txhighereddata.org/Reports/PDF/1860.PDF>.
