Raymund A. Paredes, COMMISSIONER OF HIGHER EDUCATION

Agency Mission

The mission of the Texas Higher Education Coordinating Board (THECB) is to provide leadership and coordination for the Texas higher education system and to promote access, affordability, quality, success, and cost efficiency through *60x30TX*, resulting in a globally competitive workforce that positions Texas as an international leader.

Agency Vision

The THECB will be recognized as an international leader in developing and implementing innovative higher education policy to accomplish our mission.

Agency Philosophy

The THECB will promote access to and success in quality higher education across the state with the conviction that access and success without quality is mediocrity and that quality without access and success is unacceptable.

The Coordinating Board's core values are:

Accountability: We hold ourselves responsible for our actions and welcome every opportunity to educate stakeholders about our policies, decisions, and aspirations.

Efficiency: We accomplish our work using resources in the most effective manner.

Collaboration: We develop partnerships that result in student success and a highly qualified, globally competent workforce.

Excellence: We strive for preeminence in all our endeavors.

The Texas Higher Education Coordinating Board does not discriminate on the basis of race, color, national origin, gender, religion, age or disability in employment or the provision of services.

Definitions

Applications: The counts of undergraduate applications by Texas resident students, statewide or to institutions other than The University of Texas at Austin (UT-Austin) and Texas A&M University (TAMU), include duplications, unless otherwise noted, because students often apply to more than one institution. Total applications to UT-Austin and TAMU include applicants who apply to both institutions.

Race/ethnicity: This report summarizes data by the race/ethnicity of Texas resident students – African American, Hispanic, “other,” or white – based on the racial/ethnic category reported to the Texas Higher Education Coordinating Board (THECB). Beginning in fall 2010, and in conjunction with a change in federal requirements for reporting race/ethnicity, students who report being multi-racial are included in the “other” category, unless they report one of their races as African American; in that case, the THECB classifies them as African American.

High schools with low university-going rates: These Texas high schools are defined in statute as being among the lowest 20 percent of public high schools based on the percentage of their graduates who enroll in a four-year institution, including a general academic teaching institution, in one of the two academic years following the year of an applicant’s high school graduation.

Regions: The THECB disaggregates the state into 10 higher education regions. Appendix E provides a map of these regions.

Small school: A high school is defined as “small” if it has less than 50 graduates.

Low socio-economic status (SES): Students are identified as having low SES if they were reported to the Texas Education Agency as economically disadvantaged. For example, students would be classified this way if they were eligible for free or reduced-price lunches under the National School Lunch Program or if they came from a family with an annual income at or below the official federal poverty line.

First-time-in-college (FTIC) enrollees: Students are considered FTIC enrollees if they are reported on the THECB Enrollment Report as FTIC students with a permanent residence in Texas.

Top 10% enrollees: First-time-in-college resident students are considered top 10% enrollees if they enrolled at a Texas public university which recorded them as ranked in the top 10 percent of their Texas high school graduating class.

Executive Summary

The Texas “top 10% law” (75th Texas Legislature, 1997) directs public universities in Texas to admit all undergraduate Texas resident applicants who graduate in the top 10 percent of their high school class. The 81st Texas Legislature amended the law in 2009 so that The University of Texas at Austin (UT-Austin) was not required to offer top 10% admissions in excess of 75 percent of its first-time resident undergraduate enrollment capacity in a given year. By then, UT-Austin was enrolling about 80 percent of its resident entering class under the top 10% law. The amended law requires the Texas Higher Education Coordinating Board to prepare an annual report on the impact of the amendment on admissions. This report examines admissions and enrollment data, broken out by race/ethnicity and region, with additional attention given to high school students with low socio-economic status (SES) (those reported to the Texas Education Agency as economically disadvantaged), students who graduate from small high schools, and students whose high schools have low college-going rates. Applications and enrollment data in this report – top 10% and total – are for *first-time-in-college* (FTIC) Texas *resident* students.

Top 10% applications submitted by Texas resident public and private high school graduates grew steadily between fall 2009 and fall 2016, from 35,103 to 55,448. One reason for the increase in top 10% applications is that the average top 10% student has been applying to more institutions. For fall 2009, the average Texas top 10% applicant applied to 1.46 public universities; that rate grew to 1.74 for fall 2016. While the number of top 10% applicants grew by 32.0 percent between fall 2009 and 2016, the number of top 10% applications increased by 58.0 percent.

Combined, UT-Austin and Texas A&M University (TAMU) received about 42 percent of the statewide top 10% applications for fall 2016, the same percentage as for fall 2015 but down from about 49 percent for fall 2009. The number of top 10% applications to UT-Austin changed little between fall 2009 and 2015, fluctuating between about 9,300 and 10,500. While it increased to 11,704 for fall 2016, or 21.1 percent of the statewide total of 55,448 top 10% applications, that percentage was down 6.4 points from UT-Austin’s 27.5 percent share for fall 2009. Texas A&M University, and the group of all other public universities (excluding TAMU and UT-Austin), have received steadily increasing numbers of top 10% applications since 2009, and TAMU’s share of statewide top 10% applications fell by only 1.3 percentage points between 2009 and 2016. The uneven, slow growth in top 10% applications to UT-Austin, despite increasing numbers of Texas high school graduates, likely is related to the 75 percent provision of the Texas Legislature’s 2009 amendment and UT-Austin’s limits on enrollment growth.

Top 10% FTIC enrollment at Texas public universities grew 31.0 percent between fall 2009 and 2016 (from 16,186 to 21,207), faster than the 25.7 percent growth in total resident FTIC enrollment (including top 10%) at those institutions during the same period (from 62,674 to 78,792). The share of statewide top 10% FTIC enrollment held by UT-Austin dropped by about 6 percentage points during that time, to 26.3 percent, as TAMU’s share increased by about 1 point, to 25.5 percent. These two flagships enrolled almost 52 percent of the top 10% FTIC students in fall 2016, down from about 56 percent in fall 2009.

As the number of top 10% applications has grown, the racial/ethnic composition of students submitting the applications has shifted: while African Americans’ share of statewide top 10% applications varied in a narrow range of about 8 to 9 percent between fall 2009 and fall 2016, Hispanic students’ share grew from approximately 34 percent to 43 percent. Concurrently, the share submitted by white students fell from about 45 percent to 31 percent.

The racial/ethnic makeup of FTIC enrollment has also been changing during the shift in applications by race/ethnicity, with the exception of African Americans, whose share of statewide top 10% FTIC enrollment has been very constant at about 7 percent between fall 2009 and fall 2016. However, at the institutional level, there have been significant changes for African Americans. For example, UT-Austin's share of African American top 10% FTIC enrollees rose sharply from 15.3 percent in fall 2014 to 21.0 percent in fall 2016 (still below their 24.6 percent share in fall 2009). African Americans' share enrolled at TAMU increased from about 14 percent in fall 2009 to 18.5 percent in fall 2016, after peaking at 22.0 percent in fall 2014.

Top 10% FTIC enrollment of Hispanics increased by about 70 percent from fall 2009 to fall 2016, when it reached 8,053. That was 38.0 percent of statewide top 10% FTIC enrollment, reflecting an 8.8 percentage-point increase in share since fall 2009. The share of Hispanic top 10% FTIC students enrolled at TAMU grew 2.2 percentage points between fall 2009 and 2016, reaching 20.0 percent, after rising as high as 23.8 percent, in fall 2014. The University of Texas at Austin's share dropped 6.6 points between 2009 and 2016, to 20.9 percent, after dipping as low as 16.5 percent in fall 2014. Other public universities' share of Hispanic top 10% FTIC students trended upward by about 4 percentage points over those eight years, to 59.0 percent.

Whites' top 10% FTIC enrollment totaled 8,192 in fall 2016, 38.6 percent of the statewide total for all racial/ethnic groups. Although the 2016 level was close to fall 2009's figure of 8,294, the share of statewide top 10% enrollment had fallen by nearly 13 percentage points. Approximately 62 percent of white top 10% FTIC enrollment was at UT-Austin and TAMU in fall 2016. That combined percentage declined by only about 1 point since 2009, but TAMU's share increased by 4 points while UT-Austin's share dropped by over 5 points. The declining share of statewide top 10% FTIC enrollment since 2009 at UT-Austin for African American, Hispanic, and white students may be due to its limits on enrollment noted earlier in this section.

The distribution of FTIC enrollment at Texas public universities by Texas region of residence – total and top 10% – generally has been very similar to the distribution of public high school graduates by region of residence. For example, approximately 27 percent of Fiscal Year 2016 public high school graduates resided in the Metroplex, about 25 percent of fall 2016 FTIC enrollment in public universities came from the Metroplex, and about 25 percent of fall 2016 top 10% FTIC enrollment came from the Metroplex.

Statewide public university enrollment of top 10% FTIC students with low SES increased from 3,926 in fall 2009 to 6,324 in fall 2016, raising the low SES share of all top 10% FTIC enrollment from 25.7 percent to 31.4 percent. Over the same period, TAMU's share of statewide top 10% FTIC students with low SES increased by half a percentage point, to 17.4 percent, after peaking at 22.3 percent in fall 2014, while UT-Austin's share fell by almost 7 points to 18.4 percent between fall 2009 and 2016.

Only 712 top 10% FTIC enrollees at public universities came from small public high schools (those with less than 50 graduates) in fall 2016, or 3.5 percent of all top 10% FTIC enrollees that fall. Some 64.3 percent of them enrolled somewhere besides UT-Austin and TAMU. A somewhat higher number of fall 2016 top 10% FTIC enrollees – 1,084, or 5.4 percent of total top 10% FTIC enrollment that fall – came from high schools with low university-going rates (the lowest 20 percent of rates). Texas A&M University and UT-Austin together enrolled 40.1 percent of these students in fall 2016, very close to fall 2009's 40.4 percent enrollment rate for these two institutions. In fall 2009, each flagship had about 20 percent of the top 10% FTIC students from high schools with low university-going rates. By 2016, TAMU's share grew to 24.1 percent while UT-Austin's share fell to 16.0 percent.

Introduction

The automatic admission statute (codified as Texas Education Code, Section 51.803, 75th Texas Legislature, 1997), known as the “top 10% law,” requires that Texas resident students who graduate in the top 10 percent of their class at public and private high schools be given automatic admission to Texas four-year public, general academic, higher education teaching institutions in one of the first two academic years after their graduation.

Over time, the top 10% law has had the greatest impact on the most selective four-year public higher education institutions, especially The University of Texas at Austin (UT-Austin), where approximately 80 percent of Texas resident first-time-in-college (FTIC) enrollees in fall 2009 were top 10% high school graduates. Texas A&M University (TAMU) had the next highest percentage of top 10% FTIC resident enrollees that fall: 50.7 percent.

The 81st Texas Legislature amended the top 10% law in 2009 to say, “Beginning with admissions for the 2011-2012 academic year, The University of Texas at Austin is not required to offer admission to applicants who qualify for automatic admission under Subsection (a) in excess of the number required to fill 75 percent of the university’s enrollment capacity designated for first-time resident undergraduate students in an academic year.”

The amended law requires UT-Austin to admit “in good faith” its estimate of the top 10% students who will comprise 75 percent of its resident undergraduate entering class. The institution is to admit these students by rank order, starting with the highest, until the school has admitted its estimate of 75 percent of its entering class. Top 10% students not admitted as part of the initial selection become part of the general admission pool with all other applicants. In 2013, with HB 1843, the 83rd Texas Legislature extended this allowance through the 2017-18 academic year, and in 2015, the 84th Texas Legislature made the 75 percent allowance for UT-Austin permanent by passing HB 2472.

The top 10% law also requires that the Texas Higher Education Coordinating Board (THECB) annually report on how this admission change for UT-Austin affects the state’s progress toward achieving the goals in its higher education plan. The state adopted a new 15-year higher education plan in 2015, *60x30TX*, to build on the successes of its previous long-range plan, *Closing the Gaps (CTG)*. The overarching goal of *60x30TX* is that at least 60 percent of Texas residents ages 25-34 will have a higher education certificate or degree by 2030. As with *CTG*, the success of *60x30TX* partly is a function of the state’s admissions policies, including the top 10% law. The THECB’s top 10% report analyzes admissions by:

- Race/ethnicity
- Socioeconomic status (SES)
- Region
- Small high schools
- High schools in the bottom 20 percent of numbers of graduates sent to four-year institutions within the first two years after graduation

This report includes data from fall 2009 through fall 2016 and compares results for top 10% FTIC resident students with results for all FTIC resident students (including top 10%). The report breaks out data into four groups of public universities: all, UT-Austin alone, TAMU alone, and “other” (excluding UT-Austin and TAMU). This report excludes data from public two-year, independent, and out-of-state higher education institutions, and for students who did not enroll in higher education by fall 2016. Applications and enrollment data in this report – top 10% and total – are for **FTIC**, Texas **resident** students.

Applications

Applications – Overview

From fall 2009 to fall 2016, applications to Texas public universities by top 10% degree-seeking applicants (recent graduates of Texas public and private high schools) grew by over 20,000, or 58.0 percent from 35,103 to 55,448 (Table 1). In the same period, applications to these institutions by all Texas public and private high school graduates (including top 10%) grew slightly faster, by 60.8 percent (from 182,307 to 293,107) ([Appendix A](#)).

Table 1. Top 10% FTIC Applications by Institution, Fall 2009-Fall 2016

Institution	Top 10% Applications							
	2009	2010	2011	2012	2013	2014	2015	2016
UT-Austin	9,638	9,787	9,558	10,496	10,069	9,340	10,451	11,704
TAMU	7,696	7,950	8,955	9,515	10,308	11,018	11,135	11,424
All Other Universities	17,769	20,537	23,584	25,630	27,966	29,238	30,172	32,320
Total	35,103	38,274	42,097	45,641	48,343	49,596	51,758	55,448

In the two most recent years of data, between fall 2015 and fall 2016, top 10% applications to public universities grew by 7.1 percent (51,758 to 55,448), compared with an 8.4 percent increase in all (including top 10%) public university applications (270,451 to 293,107) (Table 2). Together, UT-Austin and TAMU accounted for almost 57,000, or about one-fifth of the 293,107 total public university applications (including top 10%) for fall 2016. Separately, each of these institutions received about one-fifth of the top 10% applications.

Table 2. Total and Top 10% FTIC Applications by Race/Ethnicity, Fall 2015 and Fall 2016

Institution	Race/Ethnicity	Total Applications			Top 10% Applications		
		2015	2016	Percent by Race/Eth 2016	2015	2016	Percent by Race/Eth 2016
UT-Austin	Total	26,020	27,215	9.3%	10,451	11,704	21.1%
	White	10,292	10,275	12.1%	3,714	4,043	23.7%
	Afr. Am.	1,905	2,065	4.5%	703	705	15.4%
	Hispanic	8,051	8,791	7.1%	3,414	4,039	17.1%
	Other	5,772	6,084	15.7%	2,620	2,917	28.7%
TAMU	Total	28,582	29,773	10.2%	11,135	11,424	20.6%
	White	14,234	14,144	16.7%	5,116	5,031	29.4%
	Afr. Am.	1,614	1,869	4.1%	634	670	14.6%
	Hispanic	8,291	9,127	7.4%	3,698	3,972	16.8%
	Other	4,443	4,633	12.0%	1,687	1,751	17.2%
All Other Universities	Total	215,849	236,119	80.6%	30,172	32,320	58.3%
	White	58,088	60,494	71.2%	7,986	8,012	46.9%
	Afr. Am.	38,436	42,100	91.5%	2,760	3,208	70.0%
	Hispanic	93,647	105,554	85.5%	14,439	15,594	66.1%
	Other	25,678	27,971	72.3%	4,987	5,506	54.1%
Total	Total	270,451	293,107	100.0%	51,758	55,448	100.0%
	White	82,614	84,913	100.0%	16,816	17,086	100.0%
	Afr. Am.	41,955	46,034	100.0%	4,097	4,583	100.0%
	Hispanic	109,989	123,472	100.0%	21,551	23,605	100.0%
	Other	35,893	38,688	100.0%	9,294	10,174	100.0%

African American and Hispanic applicants submitted a smaller percentage of their applications (total and top 10%) to UT-Austin and TAMU than white students. For example, for fall 2016, 10,275, or 12.1 percent of whites' 84,913 total applications were for UT-Austin, compared with 4.5 percent for African Americans and 7.1 percent for Hispanics. There was a similar pattern at TAMU, where the percentages were 4.1 percent African American, 7.4 percent Hispanic, and 16.7 percent white.

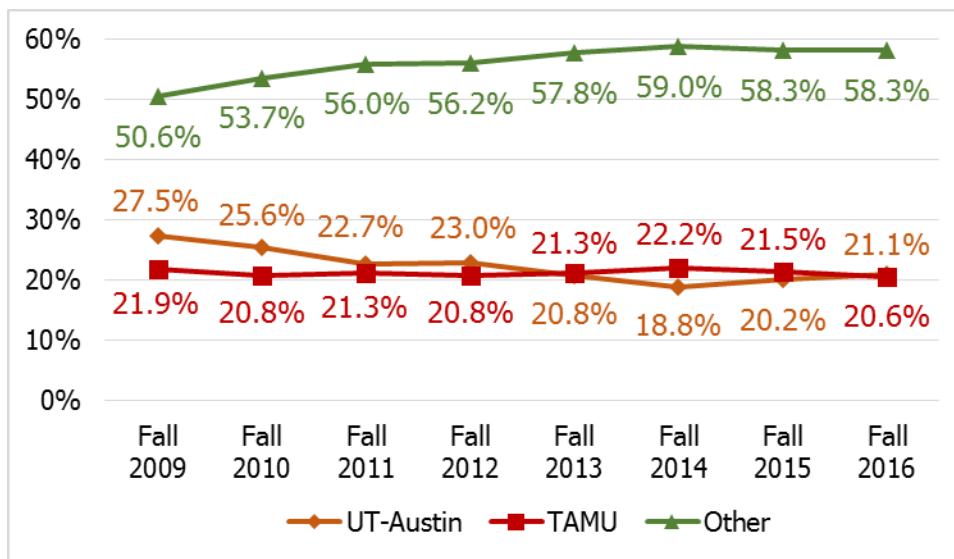

Table 3 displays the annual change in the number of applicants to public universities for fall 2009 through fall 2016 – the total and its top 10% component – as well as the total and per-applicant numbers of top 10% applications. The average top 10% student has been steadily applying to more public universities, as demonstrated by two trends. First, top 10% applications grew by 58.0 percent between fall 2009 and 2016 (as mentioned in the discussion of Table 1 data), while top 10% applicants only increased by 32.0 percent, from 24,123 to 31,843. Second, the average top 10% applicant applied to 1.74 universities for fall 2016, up from 1.46 for fall 2009.

Table 3. Total FTIC Applicants and Top 10% FTIC Applicants and Applications, Fall 2009-Fall 2016

Year	Total Applicants		Top 10% Applicants		Top 10% Applications	
	Number	Annual Growth	Number	Annual Growth	Number	Applications Per Applicant
2009	116,275		24,123		35,103	1.46
2010	123,665	6.4%	25,576	6.0%	38,274	1.50
2011	128,332	3.8%	26,901	5.2%	42,097	1.56
2012	136,766	6.6%	28,355	5.4%	45,641	1.61
2013	140,239	2.5%	28,992	2.2%	48,343	1.67
2014	144,597	3.1%	29,777	2.7%	49,596	1.67
2015	146,978	1.6%	29,990	0.7%	51,758	1.73
2016	159,087	8.2%	31,843	6.2%	55,448	1.74

The University of Texas at Austin received 11,704, or 21.1 percent of 55,448 statewide top 10% applications from Texas residents for fall 2016 (Table 2, [Appendix Table A.8](#), and Figure 1). That share was up from a low of 18.8 percent for fall 2014 (which was followed by 20.2 percent for fall 2015), but it was still 6.4 percentage points below the 27.5 percent share for fall 2009. The 6.4-point drop was much greater than UT-Austin’s 2.6-point drop in share of all applications during that time (from 11.9 percent to 9.3 percent). These developments may be due to the 75 percent cap in the top 10% law enacted for admissions in fall 2011, mentioned earlier in this report, and to reduced enrollment growth recently at UT-Austin. Its enrollment totaled 50,995 in fall 2009 and grew to 52,186 in fall 2012 before trending downward to 51,281 in fall 2016, just 286 more than seven years earlier. In contrast to UT-Austin, TAMU’s fall 2016 enrollment of 60,435 was almost 12,000, or 24.1 percent greater than in fall 2009. From 2009 to 2016, its share of statewide top 10% applications fell by just 1.3 percentage points, to 20.6 percent.

Figure 1. Institutional Shares of Statewide Top 10% FTIC Applications

Texas public universities other than UT-Austin and TAMU saw a steady increase in their share of top 10% applications between fall 2009 and 2014, from 50.6 percent to 59.0 percent, before a small drop to 58.3 percent for fall 2015 and 2016. For all Texas resident applications (including top 10%) to public universities other than the two flagships, the percentage of

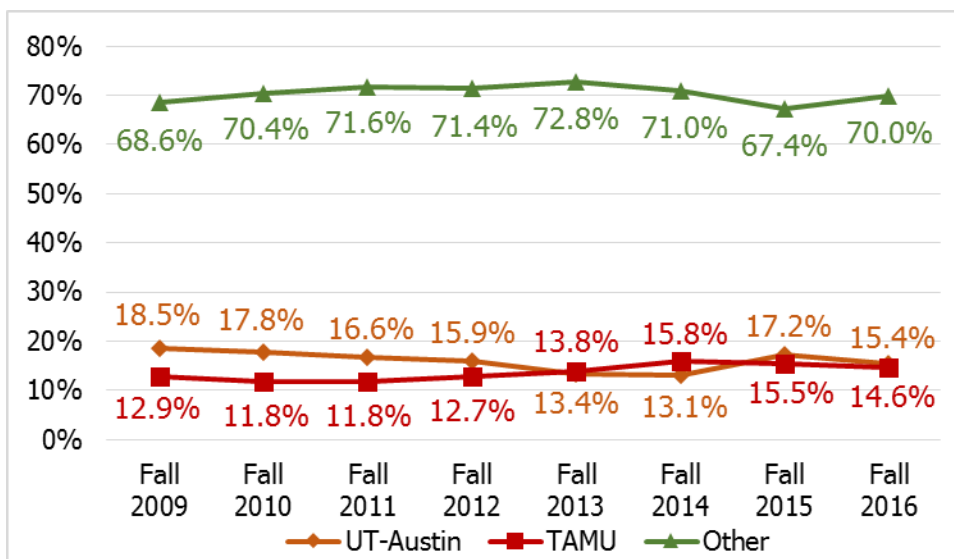

statewide applications rose 3.6 points from fall 2009 (77.0 percent) to fall 2016 (80.6 percent or 236,119/293,107) ([Appendix A](#)).

Applications – African American

Total applications to public universities from African Americans increased every fall between 2009 and 2016, except in 2013, rising from 29,547 to 46,034. African Americans’ share of all applications during those years ranged from 15.4 percent for fall 2013 to 16.8 percent for fall 2012. In fall 2016, they had a 15.7 percent share (46,034/293,107) ([Appendix A](#)). African American top 10% applications represented a smaller share of statewide top 10% applications, varying from 7.9 percent (for fall 2015) to 8.6 percent (for fall 2012) over the eight years. The share was 8.3 percent for fall 2016 (4,583/55,448) ([Appendix A](#)).

The University of Texas at Austin’s share of top 10% applications from African American students dropped steadily from 18.5 percent in fall 2009, to 13.1 percent in fall 2014 (Figure 2), but rebounded to 17.2 percent for fall 2015. It dropped back down to 15.4 percent for fall 2016. The share at TAMU trended up from 12.9 percent in fall 2009 to 15.8 percent in fall 2014, but fell to 14.6 percent by 2016. Other public universities’ share peaked at 72.8 percent for fall 2013 and subsequently declined by over 5 percentage points by fall 2015, before recovering to 70.0 percent for fall 2016.

Figure 2. Institutional Shares of Statewide Top 10% FTIC Applications, African American

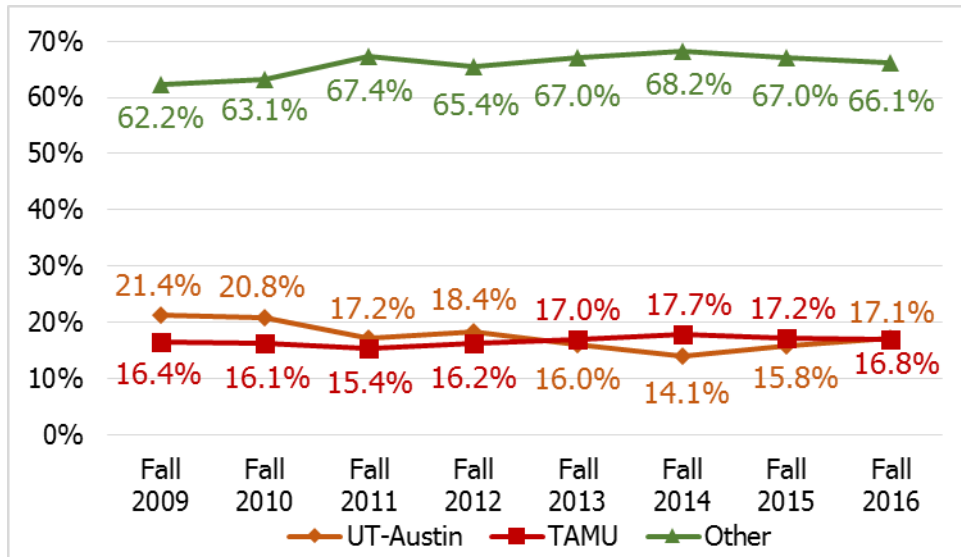

Applications – Hispanic

Hispanic students have been rapidly increasing both total and top 10% applications to Texas public universities. They submitted a total of 59,053 applications for fall 2009 (11,824 of those were top 10%). For fall 2016, the numbers grew to 123,472 total and 23,605 top 10% applications, increases of 109.1 percent and 99.6 percent, respectively. Hispanics increased their share of statewide university applications by 9.7 percentage points, from 32.4 to 42.1 percent, between fall 2009 and fall 2016. In addition, they raised their share of top 10% applications by 8.9 points, from 33.7 to 42.6 percent.

Hispanic applications to TAMU more than doubled, from 4,305 to 9,127, between fall 2009 and 2016, and top 10% applications to TAMU doubled from 1,941 to 3,972. But TAMU’s share of statewide top 10% Hispanic applications grew just slightly, from 16.4 percent in 2009

to 16.8 percent in 2016 (Figure 3). The University of Texas at Austin received 4,039 applications from Hispanic top 10% students for fall 2016, over 600 more than for the previous fall, increasing the institution's share of statewide Hispanic top 10% applications from 15.8 percent to 17.1 percent. However, that was 4.3 percentage points below UT-Austin's 21.4 percent share in fall 2009. Other institutions received most of UT-Austin's lost share by garnering 66.1 percent of Hispanic top 10% applications for fall 2016, up from 62.2 percent for fall 2009.

Figure 3. Institutional Shares of Statewide Top 10% FTIC Applications, Hispanic

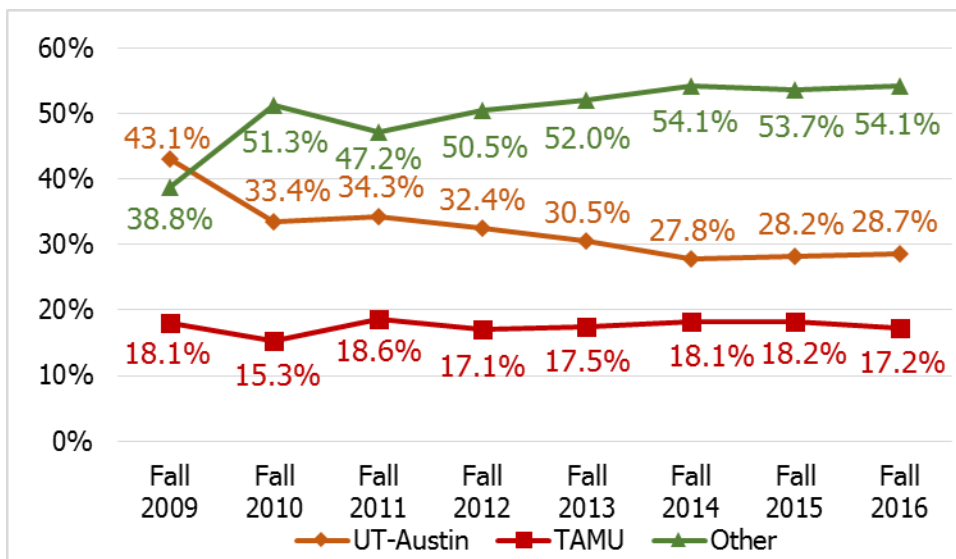

Applications – “Other” Racial/Ethnic Groups

Applications to public universities from Texas resident students with an “other” race/ethnicity (excluding African American, Hispanic, and white) grew by 124.2 percent between fall 2009 and 2016, from 17,257 to 38,688. The largest year-to-year increase occurred in fall 2010, when there were 25,018 applications by “other” students, 7,761 or 45.0 percent more than the previous year. One reason for this increase could be that the THECB revised definitions for racial/ethnic categories in fall 2010 to match more closely new federal requirements. The revised definitions included classifying multiracial students as either African American or “other.” The “other” group’s share of statewide applications grew from 9.5 percent to 13.3 percent between fall 2009 and 2015, and decreased very slightly to 13.2 percent the following fall. Top 10% applications from the “other” racial/ethnic group increased from 4,413 for fall 2009 (12.6 percent of 35,103 total top 10% applications) to 10,174 for fall 2016 (18.3 percent of 55,448 top 10% applications that year).

The most dramatic change in top 10% applications by “other” FTIC students occurred between 2009 and 2010, when the share of top 10% applications to institutions other than the two flagships jumped from 38.8 percent to 51.3 percent, and the share for UT-Austin plunged nearly 10 percentage points, from 43.1 percent to 33.4 percent (Figure 4). Texas A&M University lost nearly 3 percentage points of share from 2009 to 2010. The share of top 10% applications to UT-Austin improved a little for fall 2011 (to 34.3 percent), but it fell to 27.8 percent by fall 2014 before recovering somewhat to 28.7 percent by fall 2016. The share of top 10% applications to TAMU by students in the “other” category fell by a percentage point between fall 2015 and 2016, to 17.2 percent.

Figure 4. Institutional Shares of Statewide Top 10% FTIC Applications, “Other”

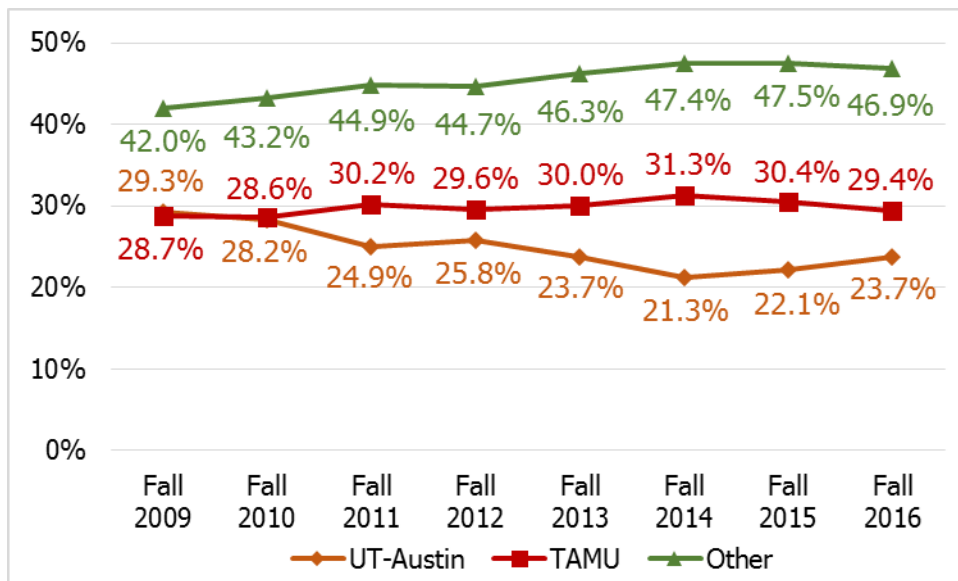

Applications – White

White students’ share of statewide applications to Texas public universities dropped by almost 13 percentage points between fall 2009 and 2016 (from 76,450 of 182,307, or 41.9 percent, to 84,913 of 293,107, or 29.0 percent) ([Appendix A](#)). The share dropped despite the 11.1-percent increase in applications by whites, because applications from all other racial/ethnic groups nearly doubled, from 105,857 to 208,194. Applications from white top 10% students totaled 15,958 in 2009 and reached 17,086 in 2016. The white share of all top 10% applications fell steadily between fall 2009 and fall 2016, from 45.5 percent to 30.8 percent, a decline of 14.7 percentage points.

First-time-in-college applications for fall 2016 to UT-Austin by whites (10,275) were virtually unchanged from the previous year (10,292), and at TAMU they dropped by 90 for fall 2016, to 14,144. Applications by white students to other public universities (besides UT-Austin and TAMU) reached 60,494 for fall 2016, an increase of more than 2,000 from fall 2015's 58,088 applications. However, other institutions' statewide share fell from 47.5 percent to 46.9 percent in 2016 as UT-Austin gained 1.6 points of share (to 23.7 percent) (Figure 5). For fall 2009, 29.3 percent of top 10% applications from white students went to UT-Austin, 28.7 percent to TAMU, and 42.0 percent to other public universities. The following year, TAMU's share dropped slightly but edged higher than UT Austin's share (28.6 percent vs. 28.2 percent), and the gap grew to 10 percentage points by fall 2014 (31.3 percent versus 21.3 percent). Since then, the difference has narrowed to 5.7 points (29.4 percent for TAMU minus 23.7 percent for UT-Austin in fall 2016).

Figure 5. Institutional Shares of Statewide Top 10% FTIC Applications, White

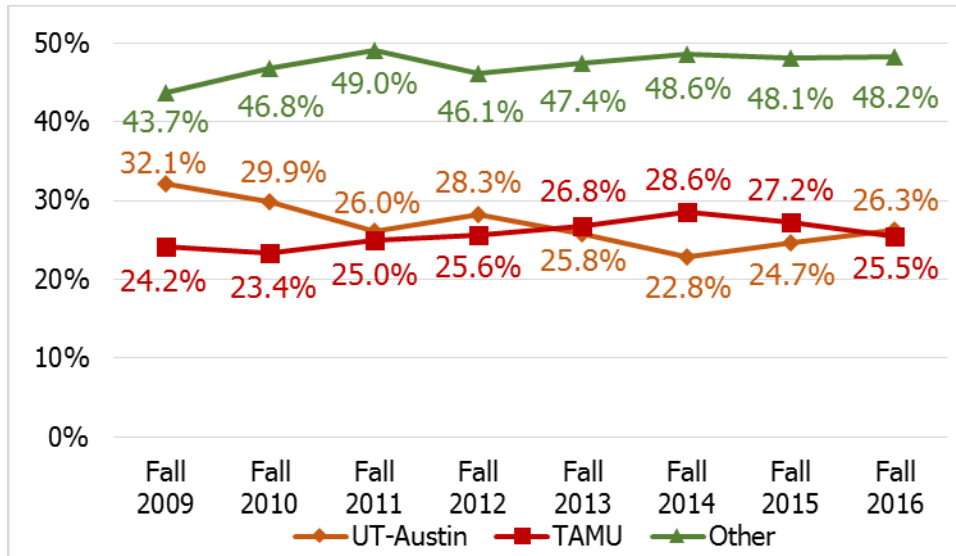

Enrollment

Enrollment – Overview

Enrollment of top 10% resident FTIC students in Texas public universities has grown steadily since fall 2009, increasing from 16,186 to 21,207 in fall 2016, a 31.0 percent gain. That growth was faster than for all Texas resident FTIC students (including top 10%), whose enrollment grew from 62,674 to 78,792, or 25.7 percent in the same time period ([Appendix A](#)). Fall 2016 total FTIC enrollment was up by 2,279, or 3.0 percent from the previous fall. That rate of increase was much higher than the 0.1 percent increase from fall 2014 to 2015. Top 10% FTIC enrollment also grew more quickly from fall 2015 to 2016 (3.1 percent) than from fall 2014 to 2015 (1.2 percent).

The University of Texas at Austin increased its share of statewide top 10% FTIC enrollment from 24.7 percent in fall 2015 to 26.3 percent in fall 2016, which exceeded TAMU's share (25.5 percent) for the first time since fall 2012 (Figure 6). However, UT-Austin's share was almost 6 percentage points below its 32.1 percent share in fall 2009, whereas TAMU's 2016 share was 1.3 points higher than in fall 2009. Top 10% FTIC enrollment at UT-Austin increased by nearly 500 in fall 2016, to 5,571, while TAMU's top 10% FTIC enrollment dropped for the second year in a row, from 5,597 in fall 2015 to 5,407 in fall 2016.

Figure 6. Institutional Shares of Statewide Top 10% FTIC Enrollment

Public universities other than UT-Austin and TAMU had 43.7 percent of all top 10% FTIC enrollment in fall 2009, and saw that percentage rise to as much as 49.0 percent (in fall 2011), before it settled most recently at 48.2 percent, in fall 2016. These other institutions' share of total FTIC enrollment (including top 10%) has changed less, rising just 1.4 points from 77.3 percent in fall 2009 to 78.7 percent in 2016. The pattern in enrollment change for top 10% students, in part, may be related to the 75 percent rule at UT-Austin, but also may be related to other factors, such as economic or demographic changes or a shift in perception about institutions' reputations and the educational value they offer.

At UT-Austin 5,571, or 72.8 percent of 7,649 Texas FTIC enrollees in fall 2016, were top 10%, down from 75.3 percent (5,076 of 6,745) in fall 2015 (Table 4). Hispanic top 10% FTIC enrollment at UT-Austin (1,685) was 82.8 percent of 2,034 total Hispanic FTIC students in fall 2016, exceeding the African American (71.7 percent) and white (67.2 percent) percentages.

Of TAMU's 9,111 FTIC students in fall 2016, 5,407, or 59.3 percent were top 10%. Hispanic students had the highest share of top 10% enrollees of total FTIC enrollment among the major racial/ethnic groups (1,613 of 2,288, or 70.5 percent) at TAMU, edging out African Americans who had a 69.8 percent share (266 of 381). White students followed with a 55.2 percent share (3,010 of 5,454). At other public universities, just 16.5 percent of FTIC enrollment (10,229 of 62,032) was top 10% in fall 2016.

Table 4. Total and Top 10% FTIC Enrollment, Fall 2015 and Fall 2016

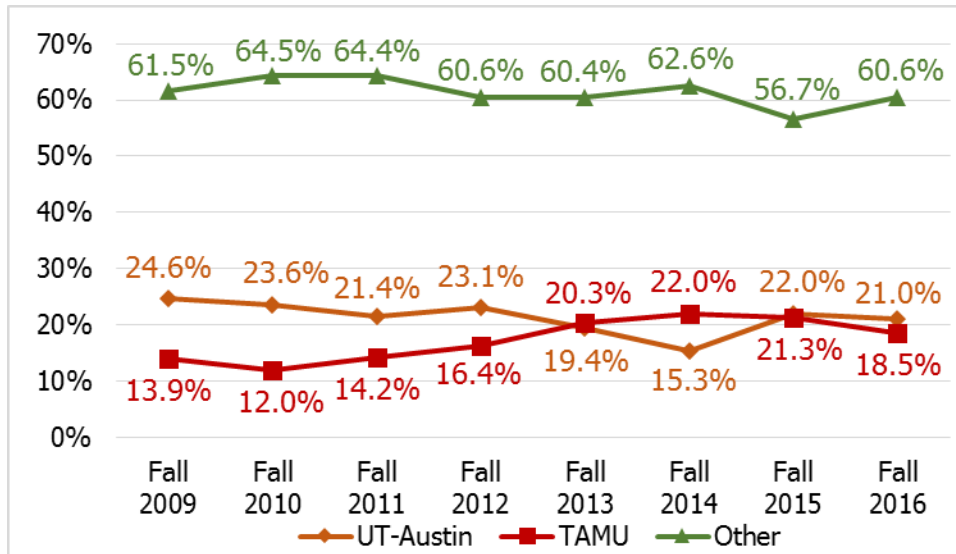

Institution	Race/ Ethnicity	Total FTIC Enrollment				Top 10% FTIC Enrollment			
		Fall 2015	Percent of Total	Fall 2016	Percent of Total	Fall 2015	Percent of Total	Fall 2016	Percent of Total

	Other	9,054	11.8%	9,434	12.0%	3,351	16.3%	3,521	16.6%

Enrollment – African American

African American FTIC enrollment of Texas residents at public universities rebounded to 10,210 in fall 2016, after falling from 10,041 to 9,798 between fall 2014 and 2015 (Table 4 and [Appendix A](#)). African Americans' share of total FTIC enrollment rose to 13.0 percent in fall 2016, but that was less than their 14.0 percent share in fall 2009 and 2010. African Americans' share of statewide top 10% FTIC enrollment increased very slightly, from 6.6 percent in fall 2015 to 6.8 percent in fall 2016. The share was between 7.0 and 7.1 percent from fall 2009 through fall 2012.

The share of statewide African American top 10% FTIC students enrolled at UT-Austin fell by 1 percentage point in fall 2016, to 21.0 percent, following an almost 7-point increase in share the previous year (Figure 7). The percentage enrolled at TAMU dropped by almost 3 points in fall 2016, to 18.5 percent. Other public universities' share of African American top 10% FTIC enrollment rebounded to 60.6 percent from 56.7 percent the previous year as UT-Austin's and TAMU's shares dropped.

Figure 7. Institutional Shares of Statewide Top 10% FTIC Enrollment, African American

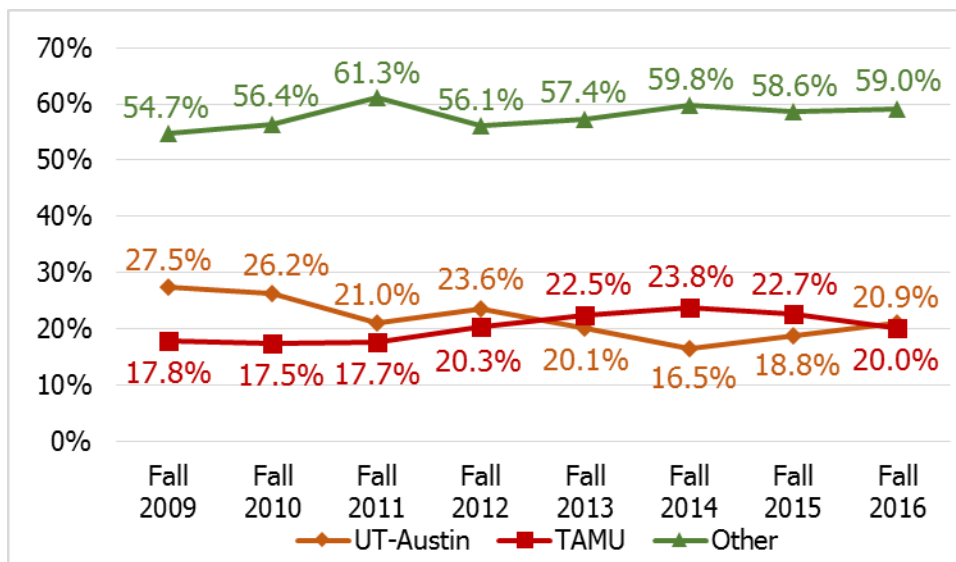

Enrollment – Hispanic

As with the growth in applications from Hispanics, Hispanic resident FTIC enrollment (total and top 10%) has been growing rapidly at Texas public universities. First-time-in-college enrollment increased by 11,642, or 61.9 percent, from 18,817 in fall 2009 to 30,459 in fall 2016. The top 10% component grew even faster (70.3 percent) in those years, from 4,730 to 8,053. Hispanic FTIC enrollment as a percentage of all FTIC enrollment went from 30.0 percent in fall 2009 to 38.7 percent in 2016. Similarly, Hispanic top 10% FTIC enrollment as a percentage of total top 10% enrollment of FTIC students increased from 29.2 percent in fall 2009 to 38.0 percent in fall 2016.

Texas A&M University increased its Hispanic resident FTIC enrollment (total and top 10%) every fall between 2009 and 2014. However, in fall 2015 those numbers dropped slightly, followed by bigger drops in fall 2016, when the institution enrolled 2,288 FTIC Hispanics (there were 2,457 in fall 2014). Some 1,613 of the fall 2016 enrollees were top 10% (20.0 percent of the statewide top 10% total) (Figure 8). The share of statewide top 10% FTIC enrollment of Hispanics for TAMU had increased from 17.8 percent to 23.8 percent between fall 2009 and 2014. The share for UT-Austin of top 10% FTIC Hispanic enrollment dropped from 27.5 percent to 16.5 percent from fall 2009 to 2014, but rebounded in fall 2015 to 18.8 percent and to 20.9 percent the next year. Public institutions other than TAMU and UT-Austin reached their greatest share of Hispanic top 10% FTIC enrollment in fall 2011, with 61.3 percent, but that share dropped over 5 percentage points the following year before trending back up to 59.0 percent in fall 2016.

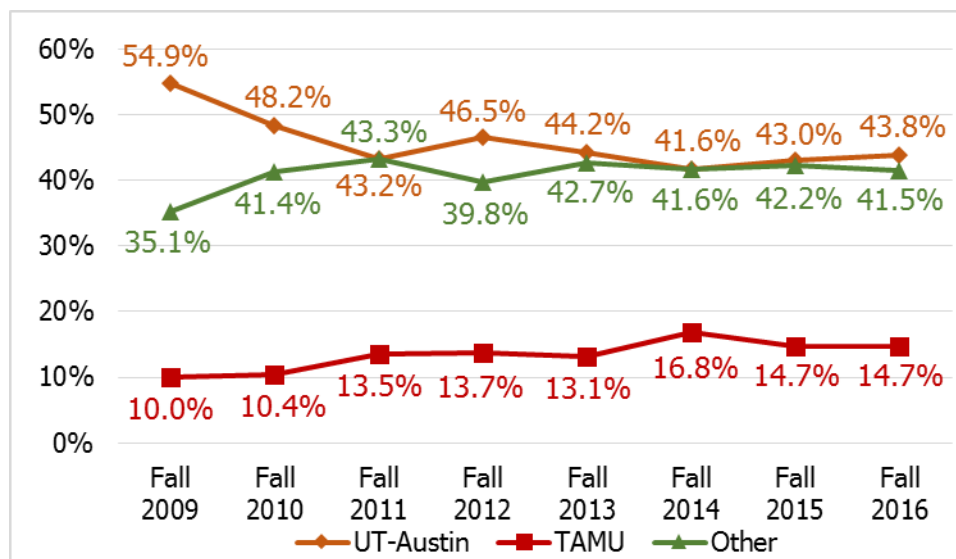

Figure 8. Institutional Shares of Statewide Top 10% FTIC Enrollment, Hispanic

Enrollment – “Other” Racial/Ethnic Groups

“Other” resident FTIC enrollment (excluding African American, Hispanic, and white) at Texas public universities grew steadily from 5,664 in fall 2009 to 9,434 in fall 2016, a 66.6 percent increase. The top 10% component grew even faster (73.5 percent), from 2,029 to 3,521. The share of statewide top 10% FTIC enrollment of “other” students at TAMU increased from 10.0 percent in fall 2009 to 16.8 percent in fall 2014, but it dropped to 14.7 percent the next two years (Figure 9). From fall 2009 to 2014, UT-Austin’s share of top 10% FTIC enrollment for “other” students plunged by more than 13 percentage points, from 54.9 percent to 41.6 percent, before recovering somewhat to 43.0 and 43.8 percent the next two years. Public universities other than the two flagships enrolled 41.5 percent of “other” race/ethnicity top 10% FTIC students in fall 2016, up 6.4 percentage points from 2009.

Figure 9. Institutional Shares of Statewide Top 10% FTIC Enrollment, “Other”

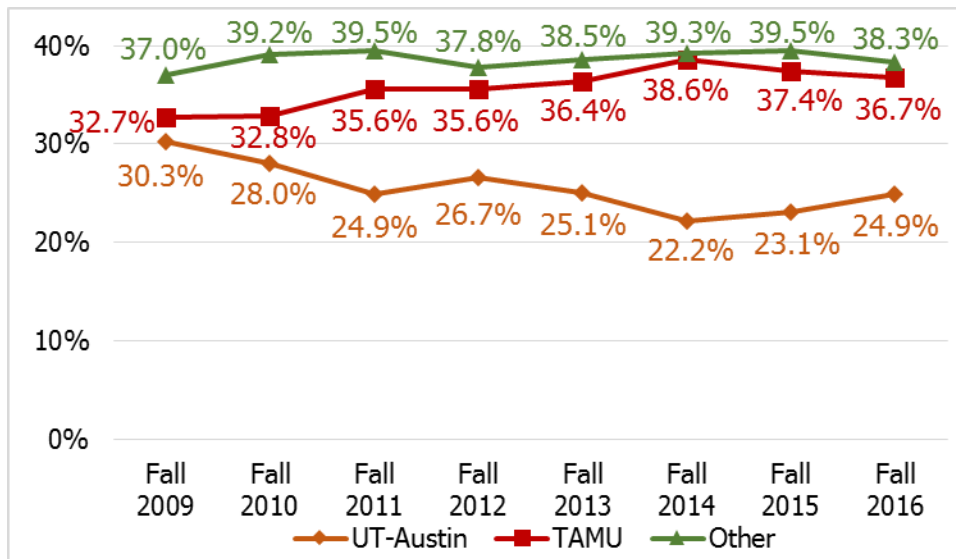

Enrollment – White

First-time-in-college enrollment of white residents in Texas public universities rose from 28,550 to 28,689 between fall 2015 and 2016. Despite that increase, the white share of statewide FTIC enrollment and its top 10% component have been declining. In fall 2009, whites accounted for 47.0 percent of total FTIC enrollment (29,428 of 62,674) at public universities. That percentage fell every year thereafter, reaching 36.4 percent (28,689 of 78,792) in fall 2016. White top 10% FTIC enrollment of 8,294 in fall 2009 made up 51.2 percent of statewide top 10% FTIC enrollment, but that share dropped steadily thereafter, reaching 38.6 percent (8,192/21,207) in fall 2016.

In fall 2009, 2,512, or 30.3 percent of the 8,294 white top 10% FTIC students enrolled in Texas public universities were at UT-Austin (Figure 10). That share trended downward through fall 2014, reaching 22.2 percent, before recovering somewhat to 23.1 percent in 2015 and 24.9 percent the following year. The opposite occurred at TAMU. Its share of white top 10% FTIC enrollees rose from 32.7 percent to 38.6 percent between 2009 and 2014 before dropping to 37.4 and 36.7 percent in fall 2015 and 2016, respectively. Since the trends of shares of white top 10% FTIC enrollment at UT-Austin and TAMU tended to balance each other out, the trend of the share at other public universities was relatively flat between 2009 and 2016, varying just 2.5 points between a low of 37.0 percent (in 2009) and a high of 39.5 percent (in 2011 and 2015).

Figure 10. Institutional Shares of Statewide Top 10% FTIC Enrollment, White

High School Graduates and Enrollment – Regional

More than one-quarter of the 324,311 Texas public high school graduates in Fiscal Year (FY) 2016 were from schools in the Metroplex (Table 5). (The figure of 324,311 includes a small number of duplications. For example, a student could have graduated from two different high schools, possibly in different regions. There were 324,291 unduplicated graduates in FY 2016 and 313,369 unduplicated graduates in FY 2015.) Gulf Coast and South Texas high schools, combined, graduated 45 percent of the FY 2016 graduates. The regional percentage distribution of high school graduates changed by no more than 0.2 percentage point for any region between FY 2015 and 2016.

Table 5. Percent of Public High School Graduates and FTIC Enrollment (Total and Top 10%) by Region of Residence

Region	Percent of High School Graduates		Percent of Total FTIC Enrollment		Percent of Top 10% FTIC Enrollment	
	FY 2015	FY 2016	Fall 2015	Fall 2016	Fall 2015	Fall 2016
High Plains	3.1%	3.0%	7.8%	6.3%	6.1%	4.9%
Northwest	2.0%	1.8%	1.4%	1.5%	1.3%	1.3%
Metroplex	27.2%	27.3%	24.2%	24.8%	24.7%	24.5%
Upper East	3.8%	3.7%	2.2%	2.2%	2.7%	2.9%
Southeast	2.6%	2.5%	2.6%	2.6%	2.9%	2.8%
Gulf Coast	24.4%	24.5%	24.9%	25.4%	25.0%	25.7%
Central Texas	10.6%	10.8%	9.8%	10.0%	10.5%	10.3%
South Texas	20.4%	20.5%	20.5%	20.7%	21.3%	22.0%
West Texas	2.0%	2.0%	1.8%	1.7%	1.6%	1.6%
Upper Rio Grande	3.9%	3.8%	4.8%	4.7%	3.9%	3.8%
Total	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%

The majority of Texas resident FTIC enrollees at Texas public universities – total and top 10% – came from the Gulf Coast, Metroplex, and South Texas in roughly the same proportions as graduated from high school in FY 2015 and 2016 ([Appendix C](#)). The Northwest and West Texas accounted for the lowest percentages of resident FTIC students – total and top 10%.

At UT-Austin, more than half of top 10% FTIC enrollees in fall 2016 came from the Gulf Coast (1,709 of 5,571, or 30.7 percent) and the Metroplex (1,404 of 5,571, or 25.2 percent) combined. A similar pattern occurred at TAMU, with 30.8 percent of 5,407 top 10% FTIC enrollees from the Gulf Coast and 22.2 percent from the Metroplex. The smallest share of top 10% FTIC enrollment at UT-Austin came from the Northwest, with 0.7 percent in fall 2016; the High Plains and West Texas provided the next smallest shares (1.0 percent each). The High Plains and the Upper Rio Grande each accounted for 1.1 percent of TAMU’s top 10% enrollees, and the Northwest and West Texas contributed 1.3 percent each.

Enrollment – Other Student Characteristics

The top 10% statute mandates examination of the top 10% data with respect to several additional student characteristics: low SES (based on high school graduation data); whether the public high school the student graduated from was “small;” and whether the high school had low university-going rates. The THECB was unable to classify about 1,000 FTIC top 10% students enrolled each fall from 2009 through 2016 (approximately 6 percent of each cohort) by

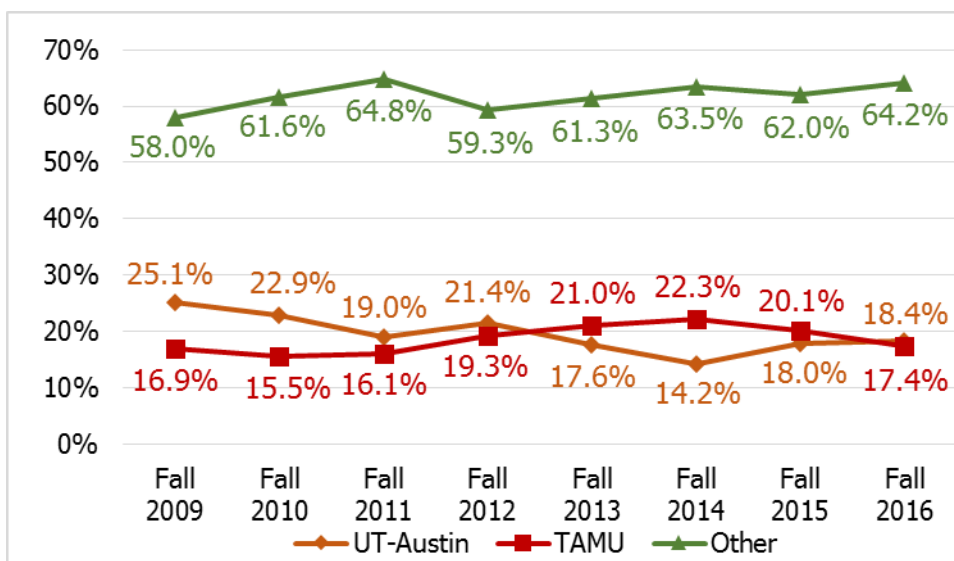

these characteristics, because these students could not be found in the two years of TEA public high school graduation data (the source of these other characteristics) that preceded each fall. Consequently, student counts in the following sections are somewhat smaller than in previous sections for some measures. [Appendices B](#) and [D](#) refer to the adjusted counts as being “without unknowns.”

Enrollment – Low SES

Statewide public university enrollment of top 10% students with low SES increased from 3,926 in fall 2009 (25.7 percent of top 10% FTIC enrollment, without unknowns, of 15,279) to 4,662 in fall 2010 (28.9 percent of top 10% enrollment) ([Appendix B](#)). Low SES top 10% enrollment increased to 6,324 by fall 2016; that was 31.4 percent of top 10% FTIC enrollment (without unknowns) of 20,136 in fall 2016, up from a 31.2 percent share in fall 2015.

In fall 2009, 662 of TAMU’s top 10% FTIC students had low SES, a 16.9 percent share of the statewide total of 3,926 students with low SES (Figure 11). The institution’s share dropped the following year to 15.5 percent, but then increased for four years, reaching 22.3 percent in fall 2014. That exceeded UT-Austin’s share (14.2 percent) for the second year in a row. Thereafter, the share at TAMU fell to 20.1 percent in fall 2015 and 17.4 percent in fall 2016, below UT-Austin’s share (18.4 percent) for the first time since fall 2012. The University of Texas at Austin’s share began at 25.1 percent in fall 2009 but trended downward through fall 2014 to 14.2 percent, before bumping up to 18.0 percent in fall 2015 and to 18.4 percent in fall 2016. Other institutions had a 58.0 percent share of statewide top 10% FTIC enrollment (with low SES) in fall 2009. Their share rose as high as 64.8 percent (in fall 2011) and it was almost that high again by fall 2016, at 64.2 percent.

Figure 11. Institutional Shares of Statewide Top 10% FTIC Enrollment, Low SES

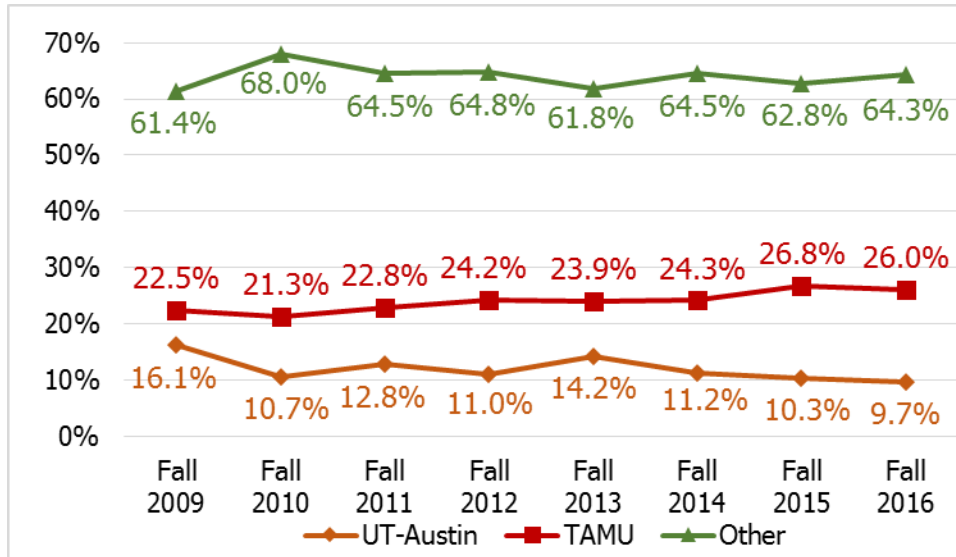

Enrollment – from Small Public High Schools

In fall 2009, 694 top 10% FTIC students from small Texas public high schools (those with less than 50 graduates) enrolled at a Texas public university ([Appendix B](#)). That was just 4.5 percent of the total top 10% enrollment (without unknowns) of 15,279 that year. There

were 712, or 18 more top 10% enrollees from small high schools in fall 2016, but their share of total top 10% FTIC enrollment (without unknowns) of 20,136 students fell to 3.5 percent.

Nearly two-thirds of top 10% FTIC students coming from small high schools typically enroll at institutions other than UT-Austin and TAMU, with TAMU enrolling about 21 to 27 percent of these students between fall 2009 and 2016 (Figure 12). Its share was 26.0 percent in fall 2016, second-highest in the eight-year period. The share enrolling at UT Austin has trended downward from 16.1 percent in fall 2009 to 9.7 percent in 2016.

Figure 12. Institutional Shares of Statewide Top 10% FTIC Enrollment, Small High Schools

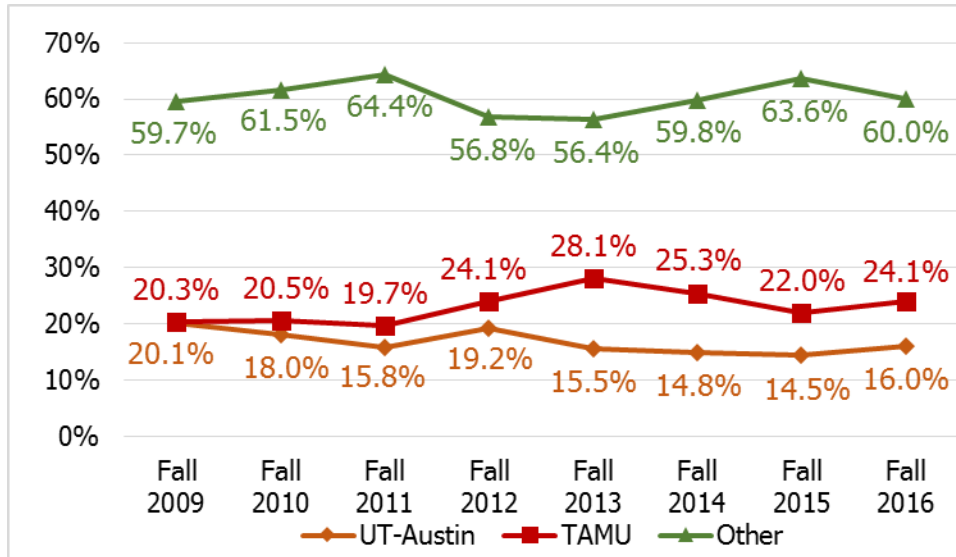

Enrollment – from Public High Schools with Low University-Going Rates

A total of 932 top 10% FTIC students from Texas public high schools with the lowest 20 percent of university-going rates enrolled in a public university in fall 2009 ([Appendix B](#)). That was 6.1 percent of total top 10% FTIC enrollment that year, without unknowns, of 15,279. The percentage dropped to 5.1 percent by fall 2015, when just 1,002 top 10% students from this group enrolled in a public university. The percentage increased slightly in fall 2016 to 5.4 percent (1,084 of 20,136 top 10% FTIC enrollees were in the “lowest 20 percent” group).

Texas A&M University increased its share of this group of students from 20.3 percent to 28.1 percent between fall 2009 and 2013, but subsequently, its share fell for two straight years, before recovering to 24.1 percent in fall 2016 (Figure 13). That was 8.1 percentage points above UT-Austin's share (16.0 percent) that year – which was 4.1 percentage points below its 20.1 percent share in fall 2009. Other public universities increased their share from 59.7 percent to 64.4 percent between fall 2009 and 2011, but then saw their share drop 8 percentage points by fall 2013 before reaching 60.0 percent in fall 2016, just 0.3 point above the fall 2009 share.

Figure 13. Institutional Shares of Statewide Top 10% FTIC Enrollment, High Schools with Low University-Going Rates

*1,071 students, who were identified as top 10% students from Texas, could not be found in the prior two years of TEA graduation records. Therefore, these students could not be included in the breakouts for measures related to high school or student characteristics. This column shows total top 10% enrollees with unknowns removed.
